TABLE OF CONTENTS

Introduction

1. Daily Bias (Long Term Perspective)
2. Market Structure (Intermediate Term Perspective)
3. Entry Model (Short Term Perspective)
4. Risk Management

LONG TERM PERSPECTIVE

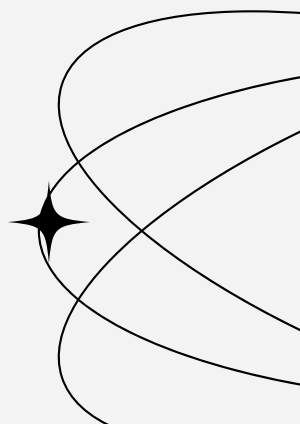

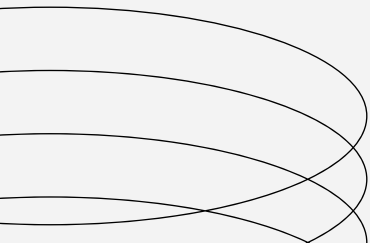

(Monthly, Weekly & Daily)

Long Term Perspective (LTP) is where you derive your Daily Bias from, the objective is to anticipate the next daily candles formation.

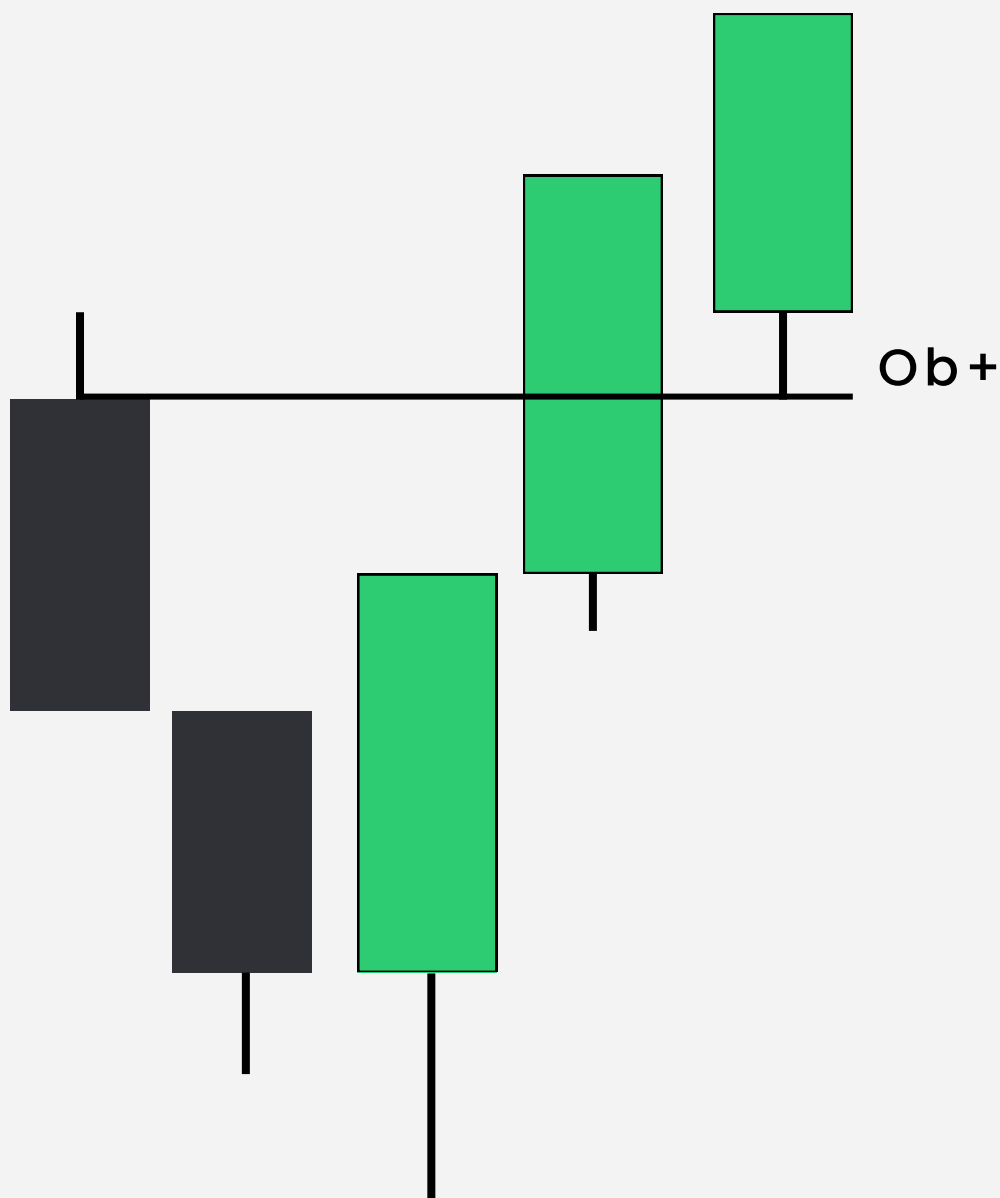

Monthly, Weekly & Daily are your LTP timeframes.

What Do We Need To Achieve Daily Bias?

- HTF Key Levels
- Premium & Discount
- Internal & External Range Liquidity
- Candle Closures

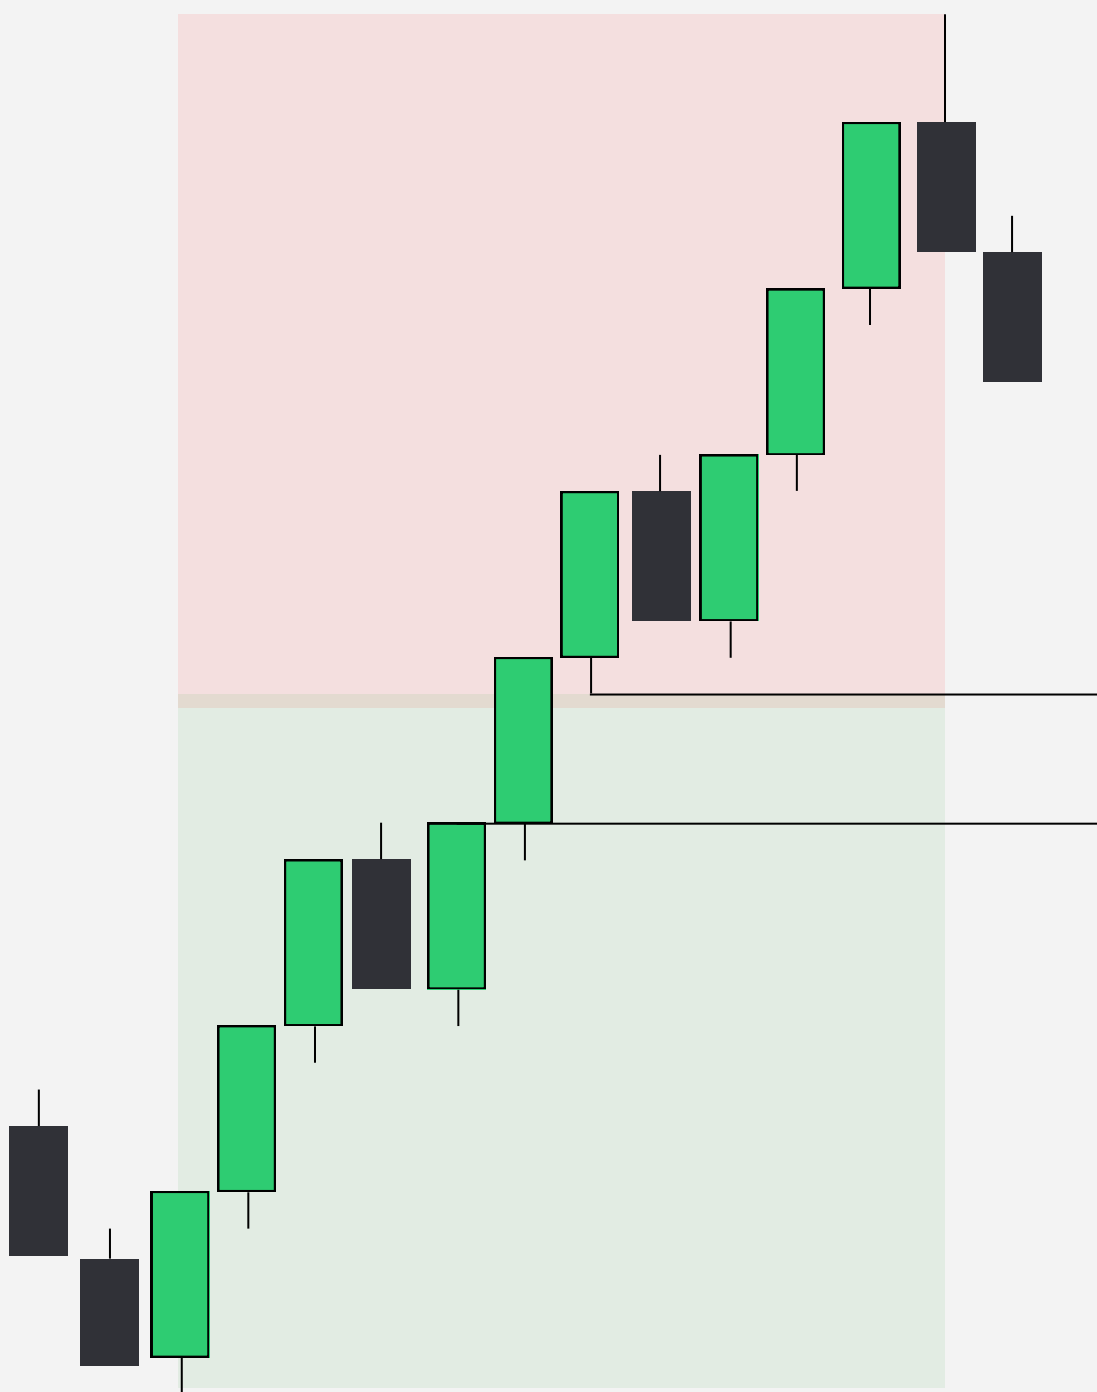

HTF KEY LEVEL

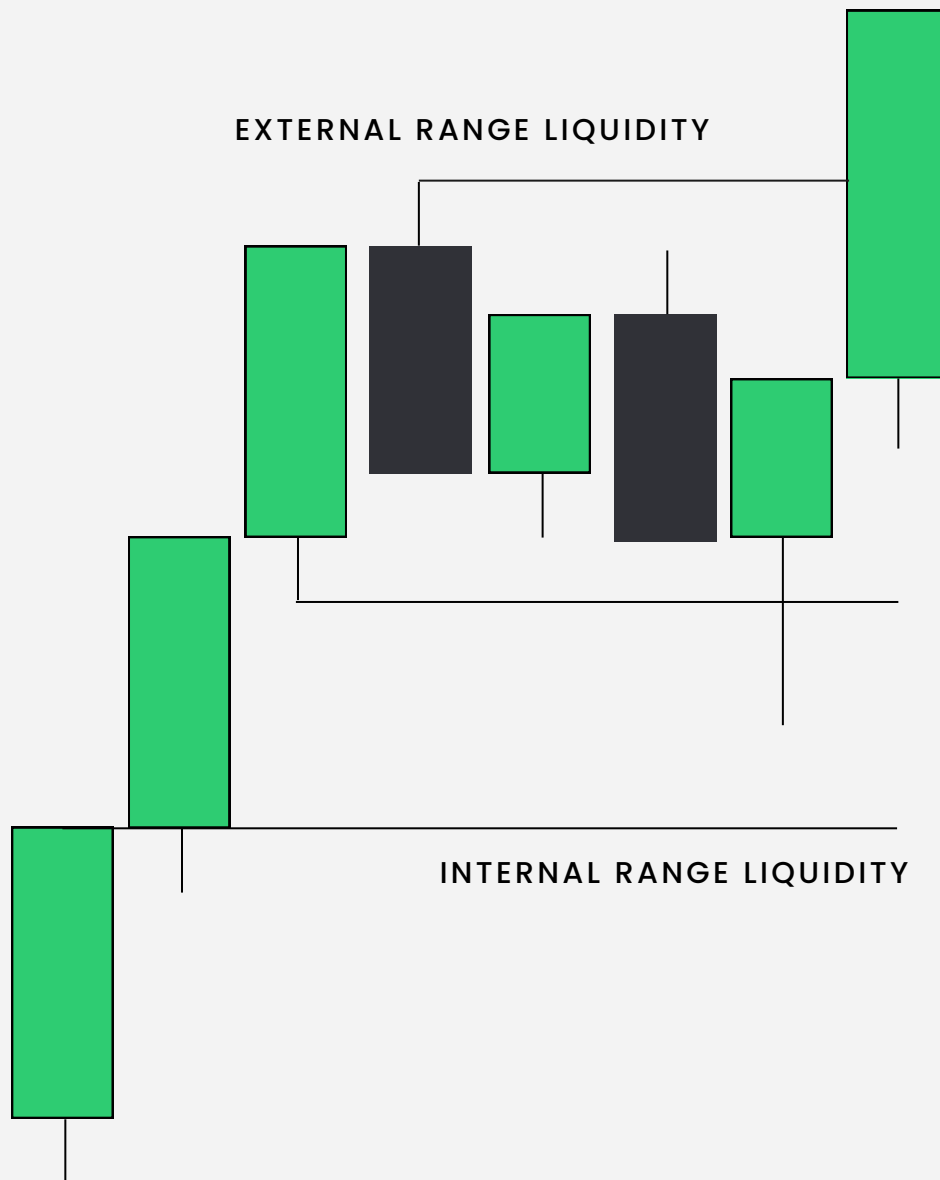

MONTHLY/WEEKLY/DAILY

PREMIUM & DISCOUNT

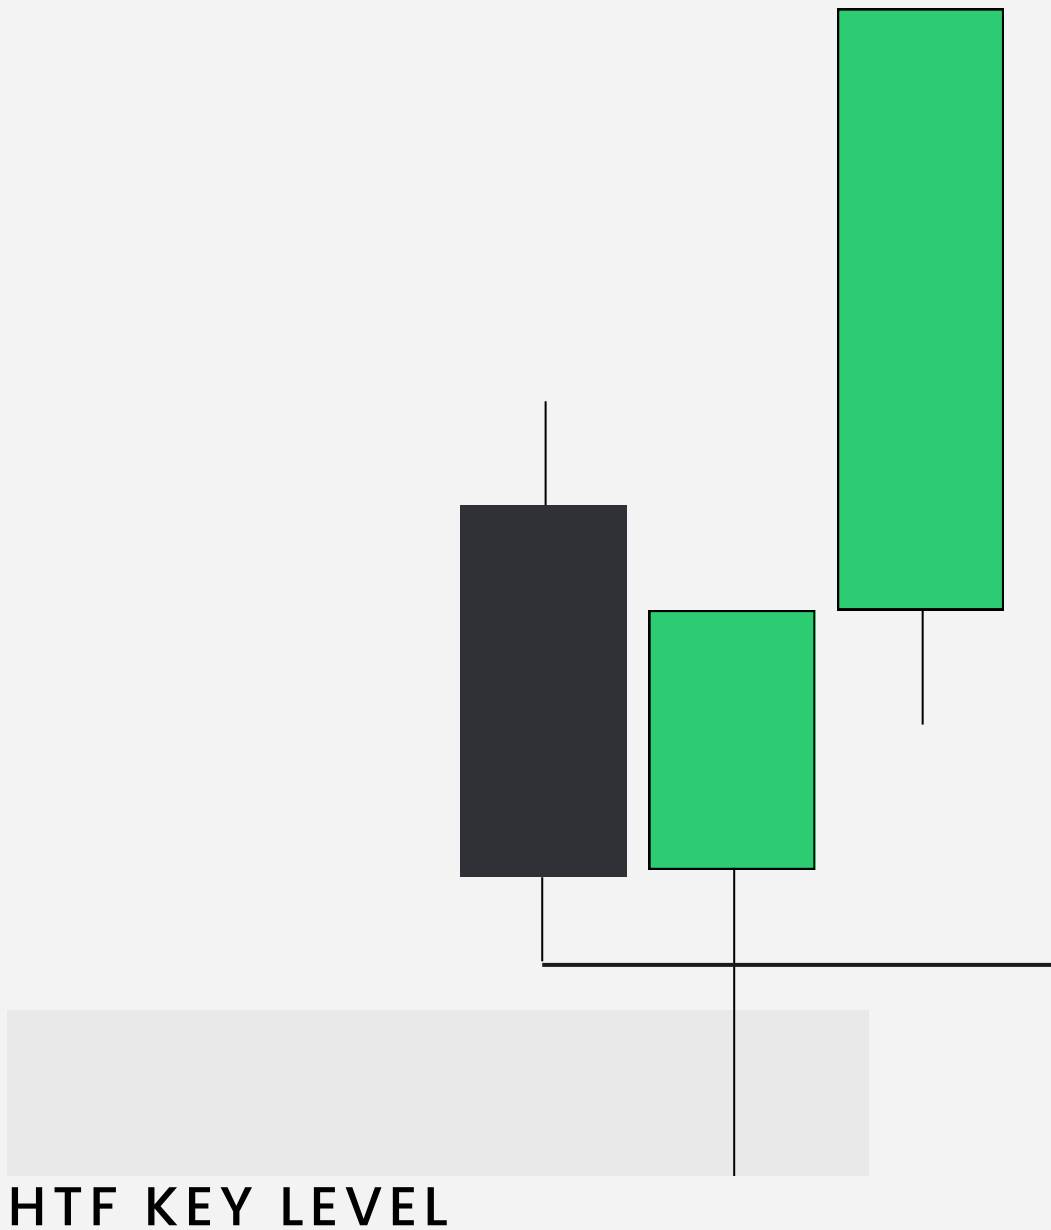

INTERNAL AND EXTERNAL RANGE LIQUIDITY

FVG = INTERNAL RANGE LIQUIDITY
OLD HIGH/LOW = EXTERNAL RANGE
LIQUIDITY

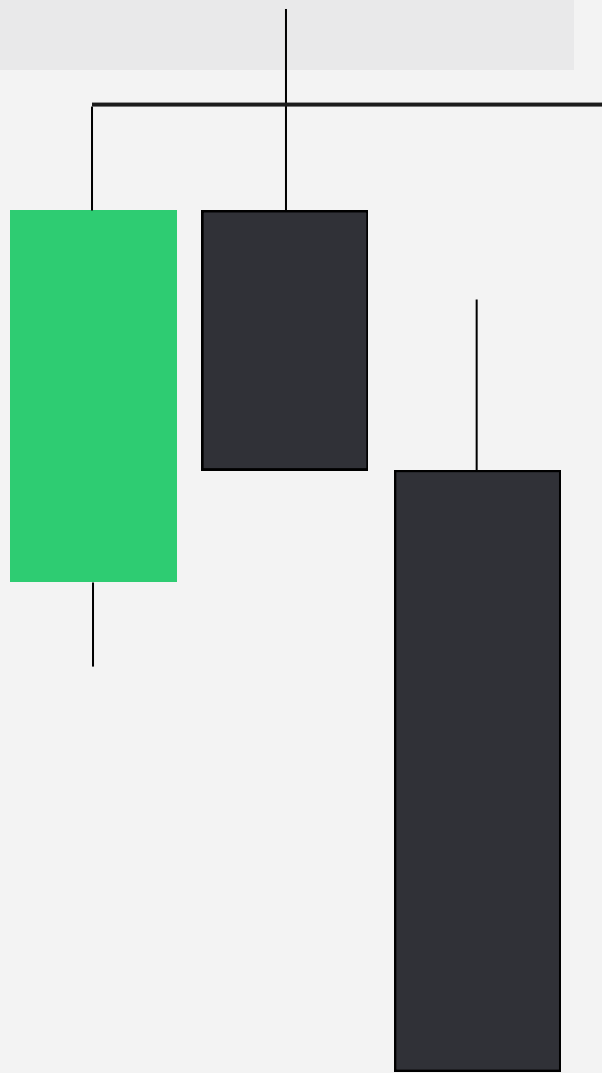

CANDLE CLOSURES

CANDLE CLOSURE - WICK BELOW
CLOSE ABOVE

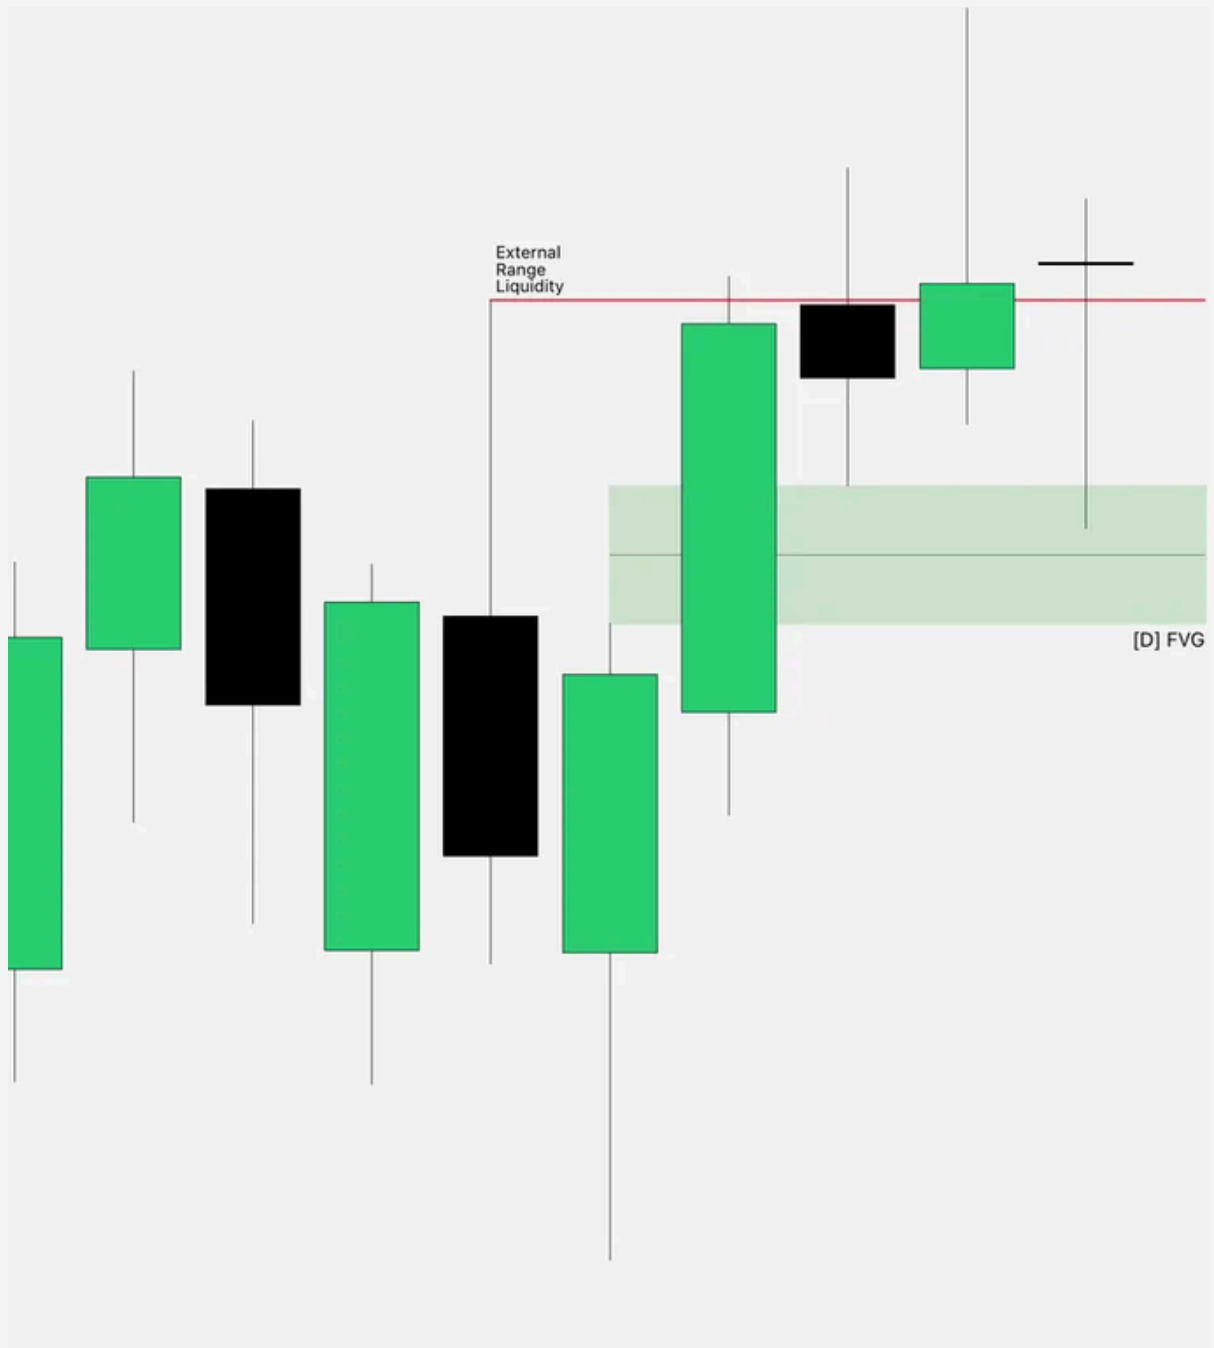

CANDLE CLOSURES

HTF KEY LEVEL

CANDLE CLOSURE - WICK ABOVE
CLOSE BELOW

PUTTING IT ALL TOGETHER

- HTF KEY LEVEL
- PREMIUM VS DISCOUNT
- IRL AND ERL
- CANDLE CLOSURES

INTERMEDIATE TERM PERSPECTIVE

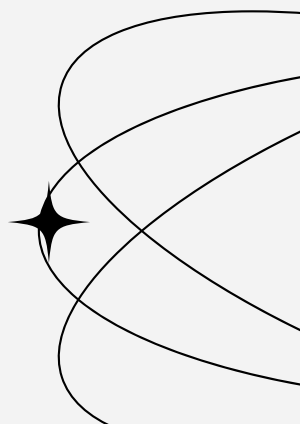

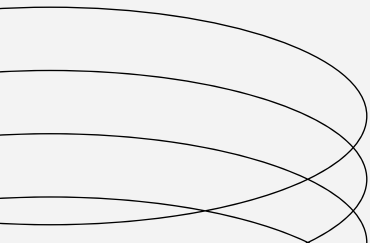

(H4 and H1)

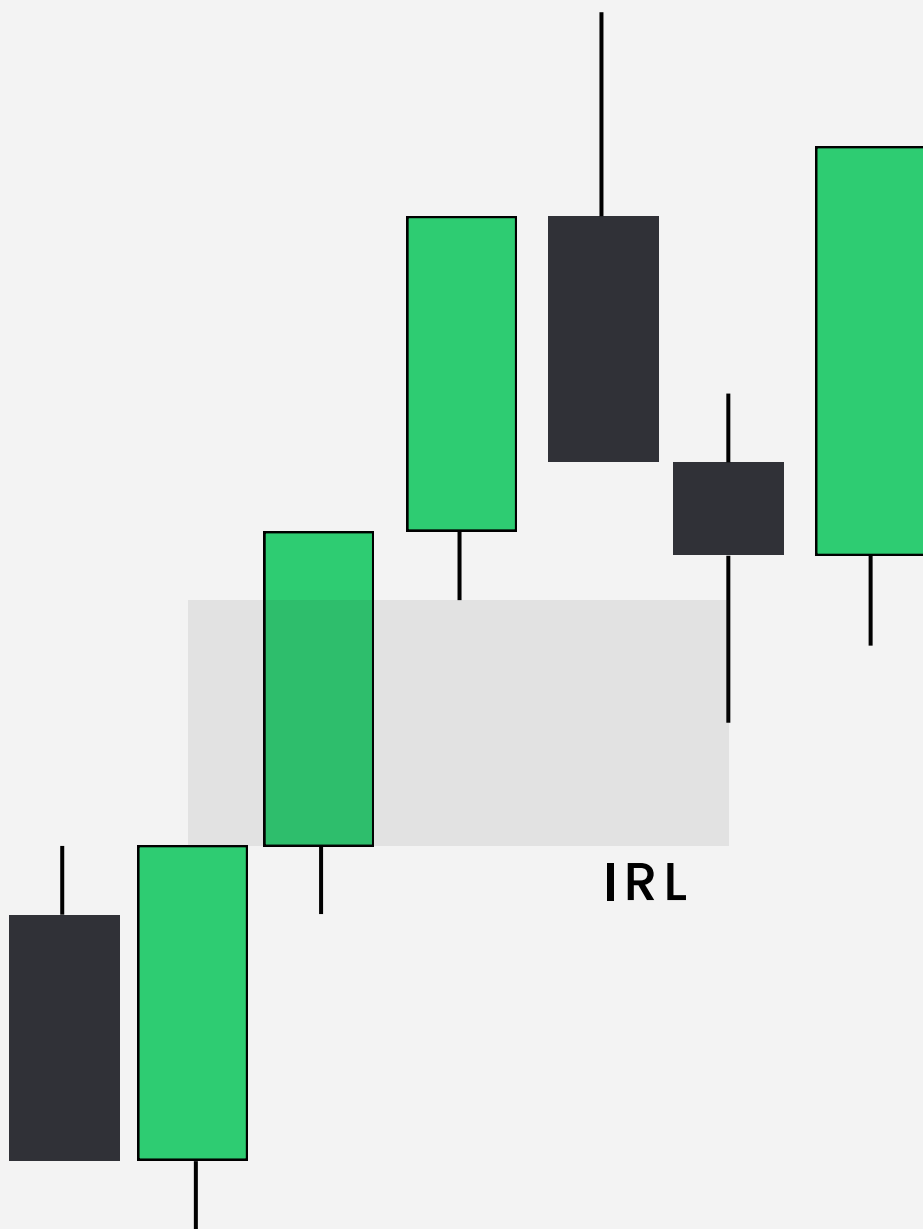

THE INTERMEDIATE TERM PERSPECTIVE IS HOW WE GET TO OUR LTP DRAW ON LIQUIDITY, WE WANT TO UTILIZE THE MARKET STRUCTURE AND PD ARRAY'S ON THIS TIMEFRAME TO HELP US GET TO THE DRAW ON LIQUIDITY.

THE HIGHEST PROBABILITY TRADES ARE WHEN THE LTP & ITP ORDER FLOW ARE ALIGNED

AS WITH EVERYTHING IN TRADING, OUR ANALYSIS STARTS WITH THE DRAW ON LIQUIDITY WHICH WE DETERMINE FROM OUR LTP TIMEFRAMES (MONTHLY, WEEKLY AND OR DAILY ANALYSIS).

AFTER WE HAVE DETERMINED OUR HTF WEEKLY OR DAILY DRAW ON LIQUIDITY WE WANT TO WAIT FOR OUR ITP TIMEFRAME TO BREAK MARKET STRUCTURE IN THE DIRECTION OF OUR LTP DRAW THIS ALIGNING THE LTP & ITP.

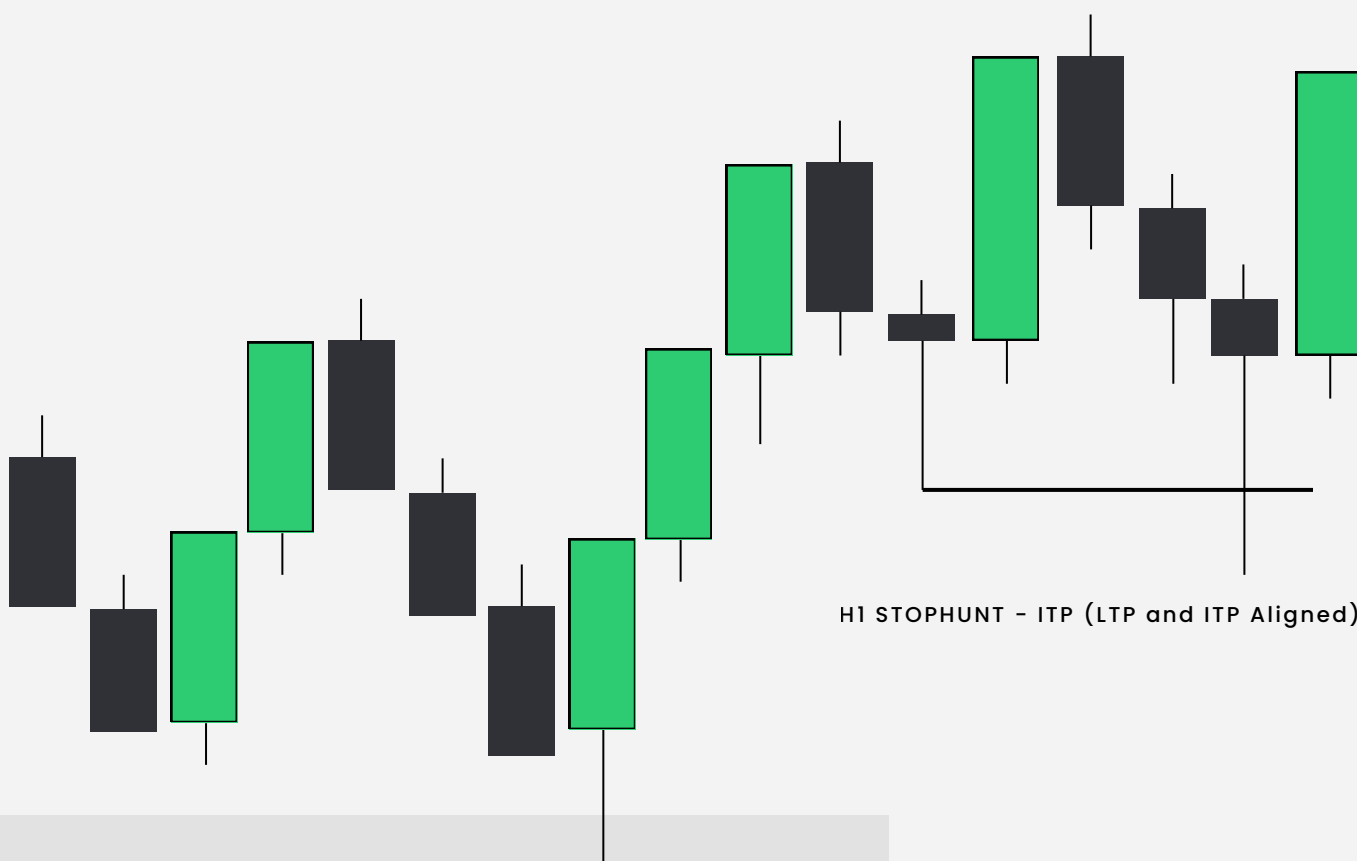

Long Term Perspective
Daily

CISD

H1 FVG - ITP (LTP and ITP Aligned)

Daily FVG - LTP

INTERMEDIATE Term Perspective
H1 Structures - FVG

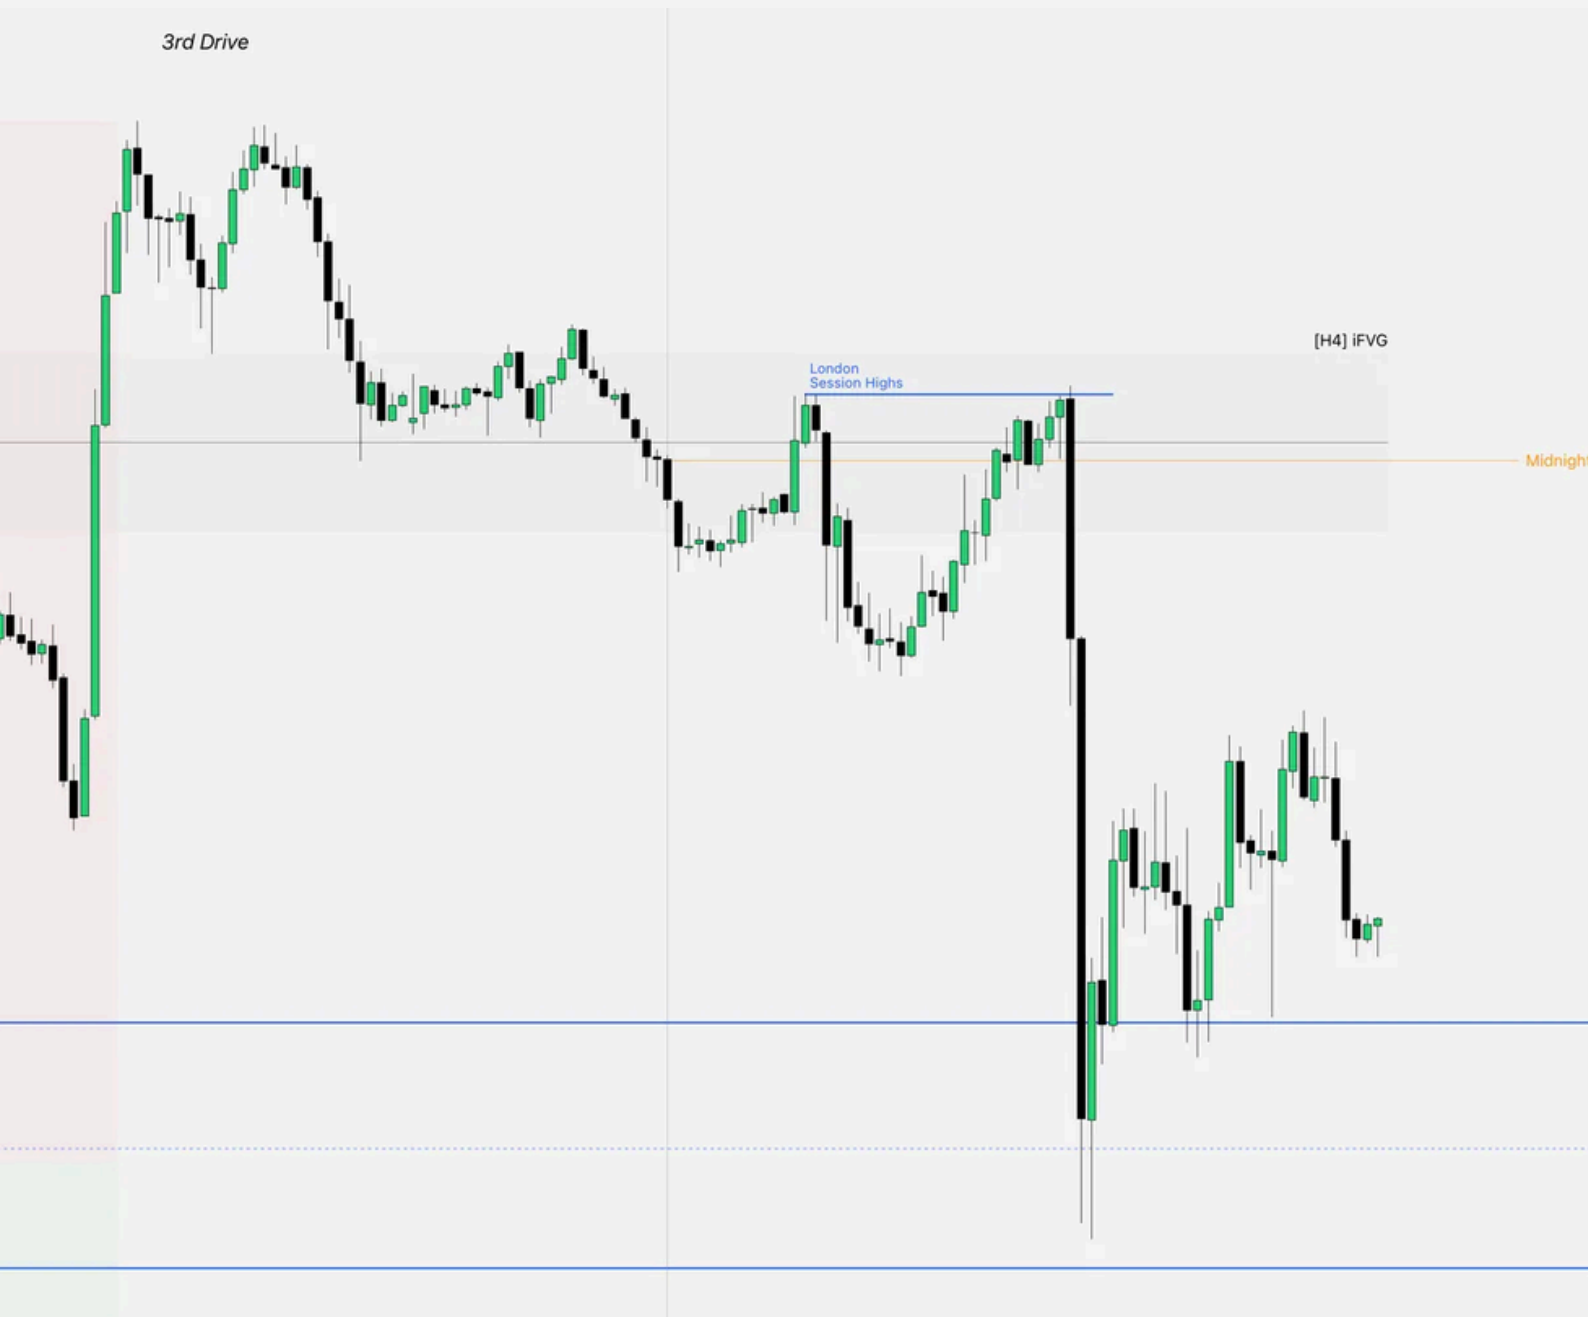

H1 STOPHUNT - ITP (LTP and ITP Aligned)

Daily FVG - LTP

INTERMEDIATE Term Perspective H1 Structures - Stophunt

LTP AND ITP ALIGNED

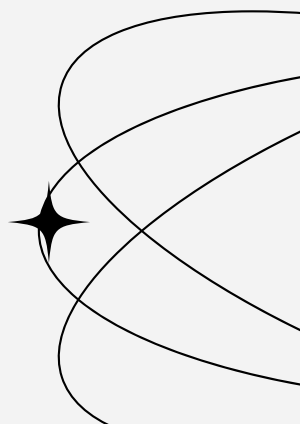

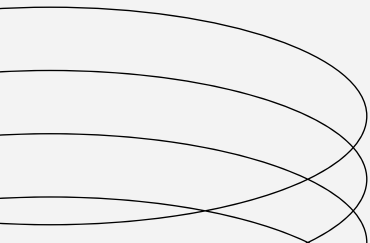

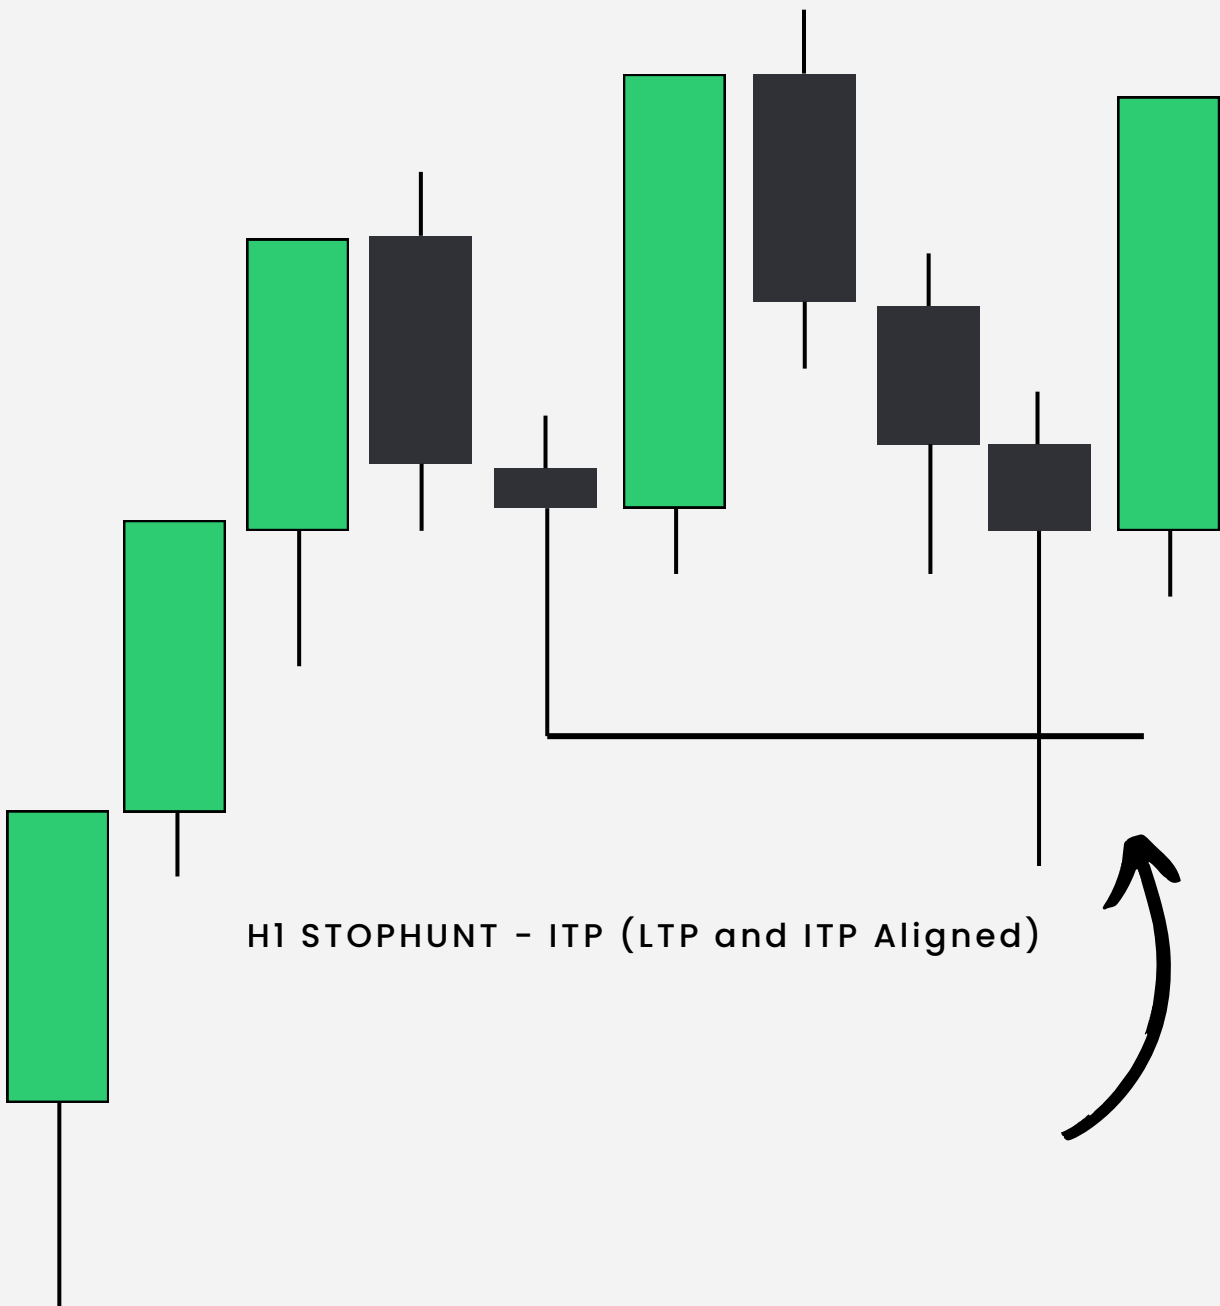

H1 StopHunt

SHORT TERM PERSPECTIVE

(m15 and lower)

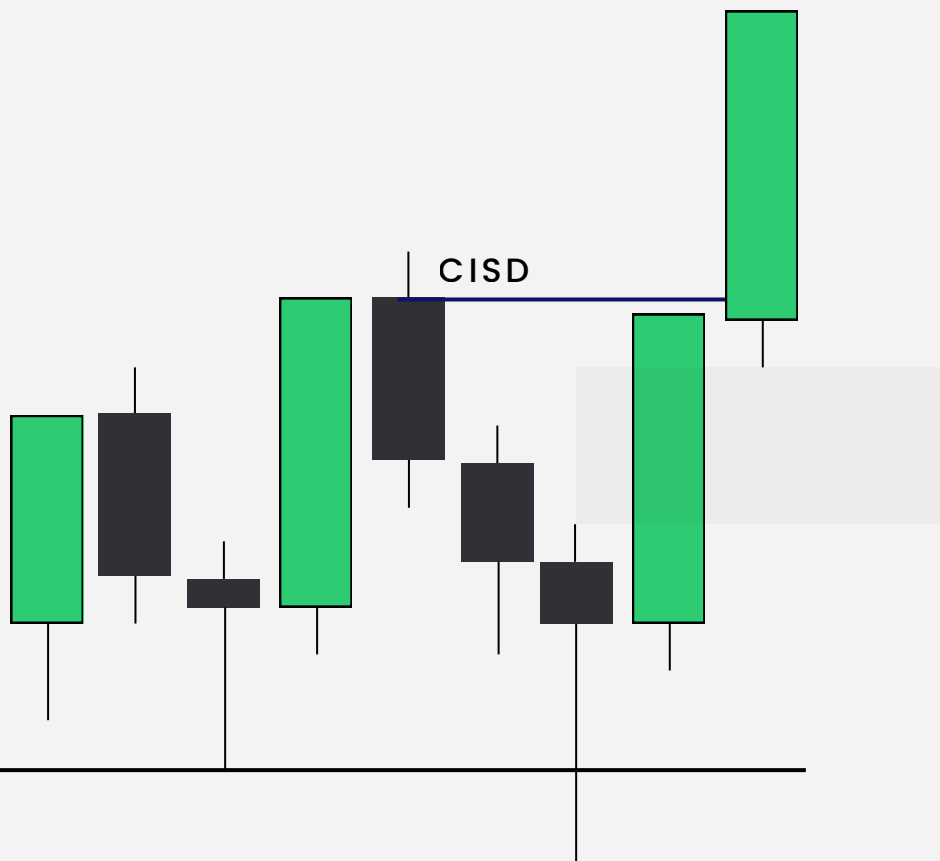

Short-term perspective is where we focus on entries that align with both the LTP and ITP.

SHORT Term Perspective

H1 Structures - Stophunt
M5,M3,M1 Entries

H1 STOPHUNT - ITP (LTP and ITP Aligned)
M5 Entry

SHORT Term Perspective
M5,M3,M1 Entries

LTP, ITP, STP ALIGNED

LTP - DAILY ERL to IRL
ITP - H1 Stophunt
STP - M5/M3 entry

RISK MANAGEMENT

Risk to Reward does the heavy lifting, you make money from risk management not from your technical edge.

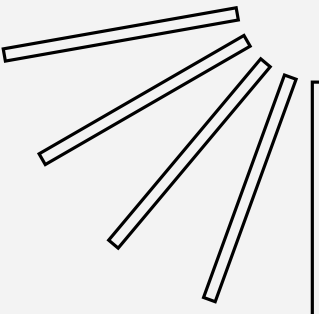

Every trade should be a 1:3
No breakevens, win or loss only.

Why?

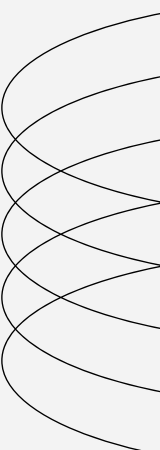

If you take 10 trades;
7 losses
3 wins
= 2% profit

If you lose 70% of the time, you can still be profitable.

Breakevens will mess with this data, the math will play out so win or loss only.

Thank you
