

HIGH PROBABILITY TRADES & ELEMENTS TO A TRADE SET UP

WHAT MAKES A SET UP WORTH TAKING?

- Smart money trade on **Monthly - Weekly - Daily** timeframes
- Selecting trade set ups on HTF charts is the foundation to profitability.
- **HTF Key levels** relative to premium & discount that align with IOF is the KEY
- **SMT** let's you know that smart money are active in the market.

ORDER PAIRING IDEA TO FRAME BUY TO SELL STOPS OR SELL TO BUY STOPS WITH YOUR KEY LEVEL IS THE SAUCE.

LOWER RISK ON TRADES BY:

- Focus on HTF
- Only long from a **discount** and short from a **premium**
- Transpose HTF to LTF charts

OPENING PRICE > KEY LEVEL > STOP HUNT > SMT > CSD IS THE FOUNDATION TO EVERY TRADE IDEA.

@everyone

Key HTF Level I am watching for NFP, bias is drop lower to the opening price and or MT of the Daily OB before a move higher.

This is my anticipation for NFP, I am not trading it prior to the news release and if proven wrong and the key level doesn't hold that will set the stage for next week as well too.

Patience for NFP to pass and tip its hand to us, no executions before.

AFTER HTF CONTEXT ESTABLISHED

TRANSPOSE HTF TO LTF CHARTS TO LOWER THE RISK

- Opening Price (PO3)
- HTF Key Level $>$ LTF Range Low to High (Order Pairing)
- OTE

ORDER PAIRING IDEA TO FRAME BUY TO SELL STOPS OR SELL TO BUY STOPS

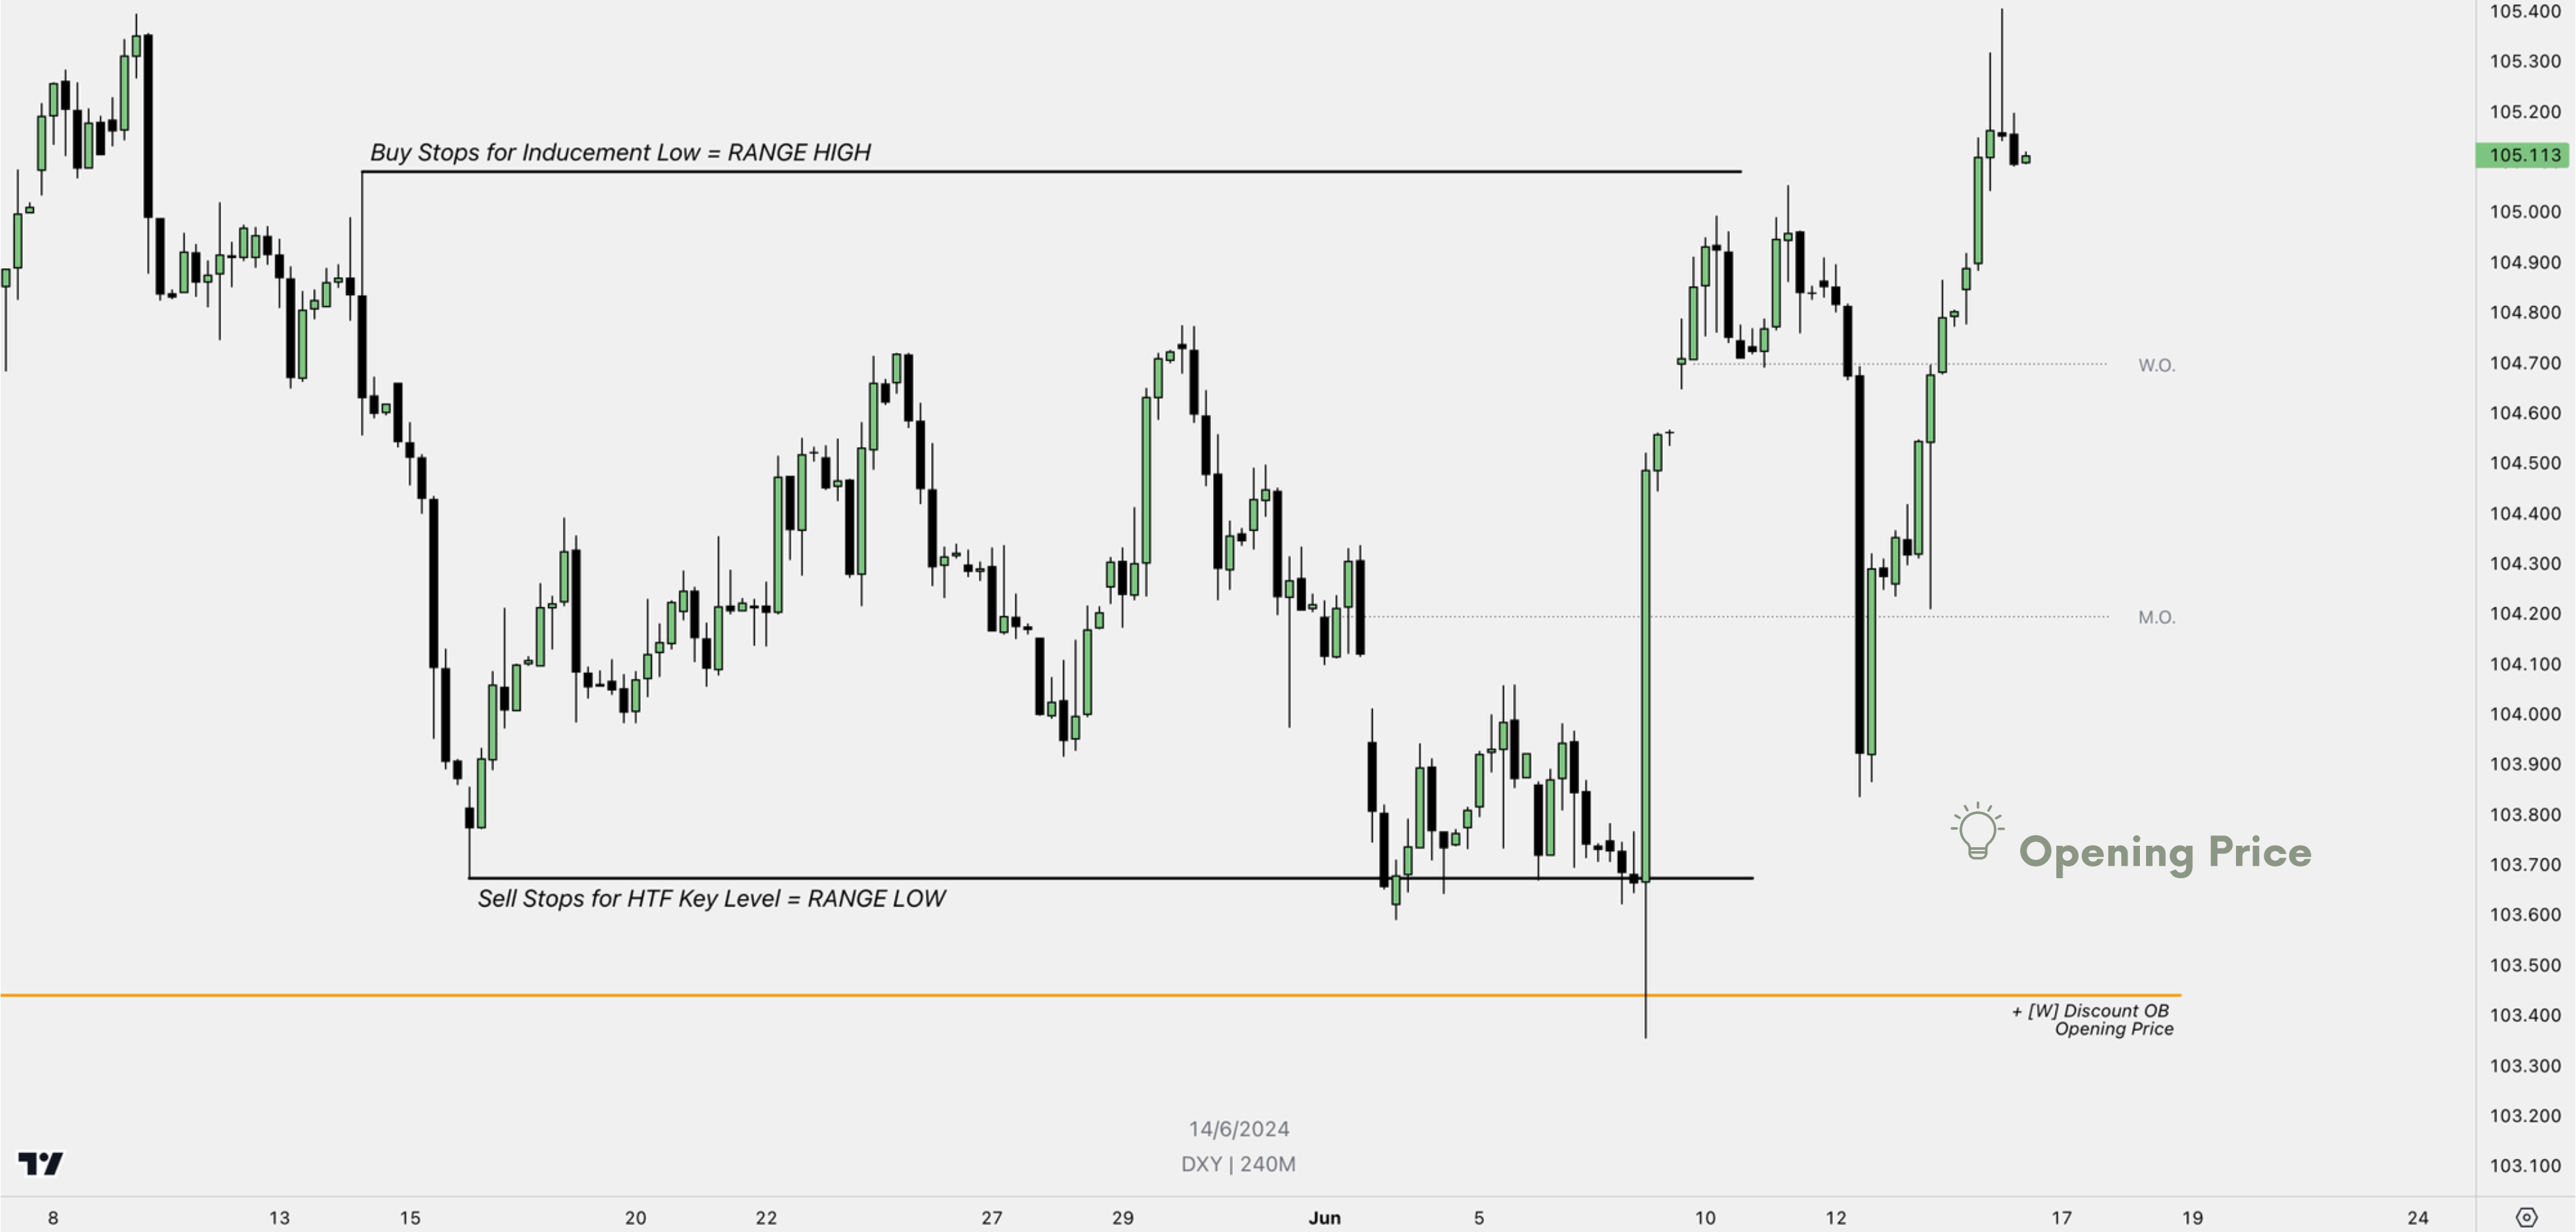

Sell Stops for HTF Key Level = RANGE LOW

Inducement = Range Low now look for the range high

We saw price reach back up into premium & the daily key level as expected and mentioned live in [@The OTE Trader](#) 's livestream, we have PPI today in NY Session and will be watching how price develops from our key level.

With Bullish DXY in play that would send USDCAD higher...

How did i call this out on the LTF?

Same Approach:

Opening Price > Key level > Stop Hunt > SMT > CSD is the foundation to every trade idea.

Morning @everyone, continuing with the same bias as we've had of Bullish DXY.

Eyes on USDCAD for now as every other asset is overextended from yesterdays move.
