

**MARKET PROFILES:
MASTERING PRICE NAVIGATION
AND
TRUSTING YOUR BIAS**

IPDA Market Cycle

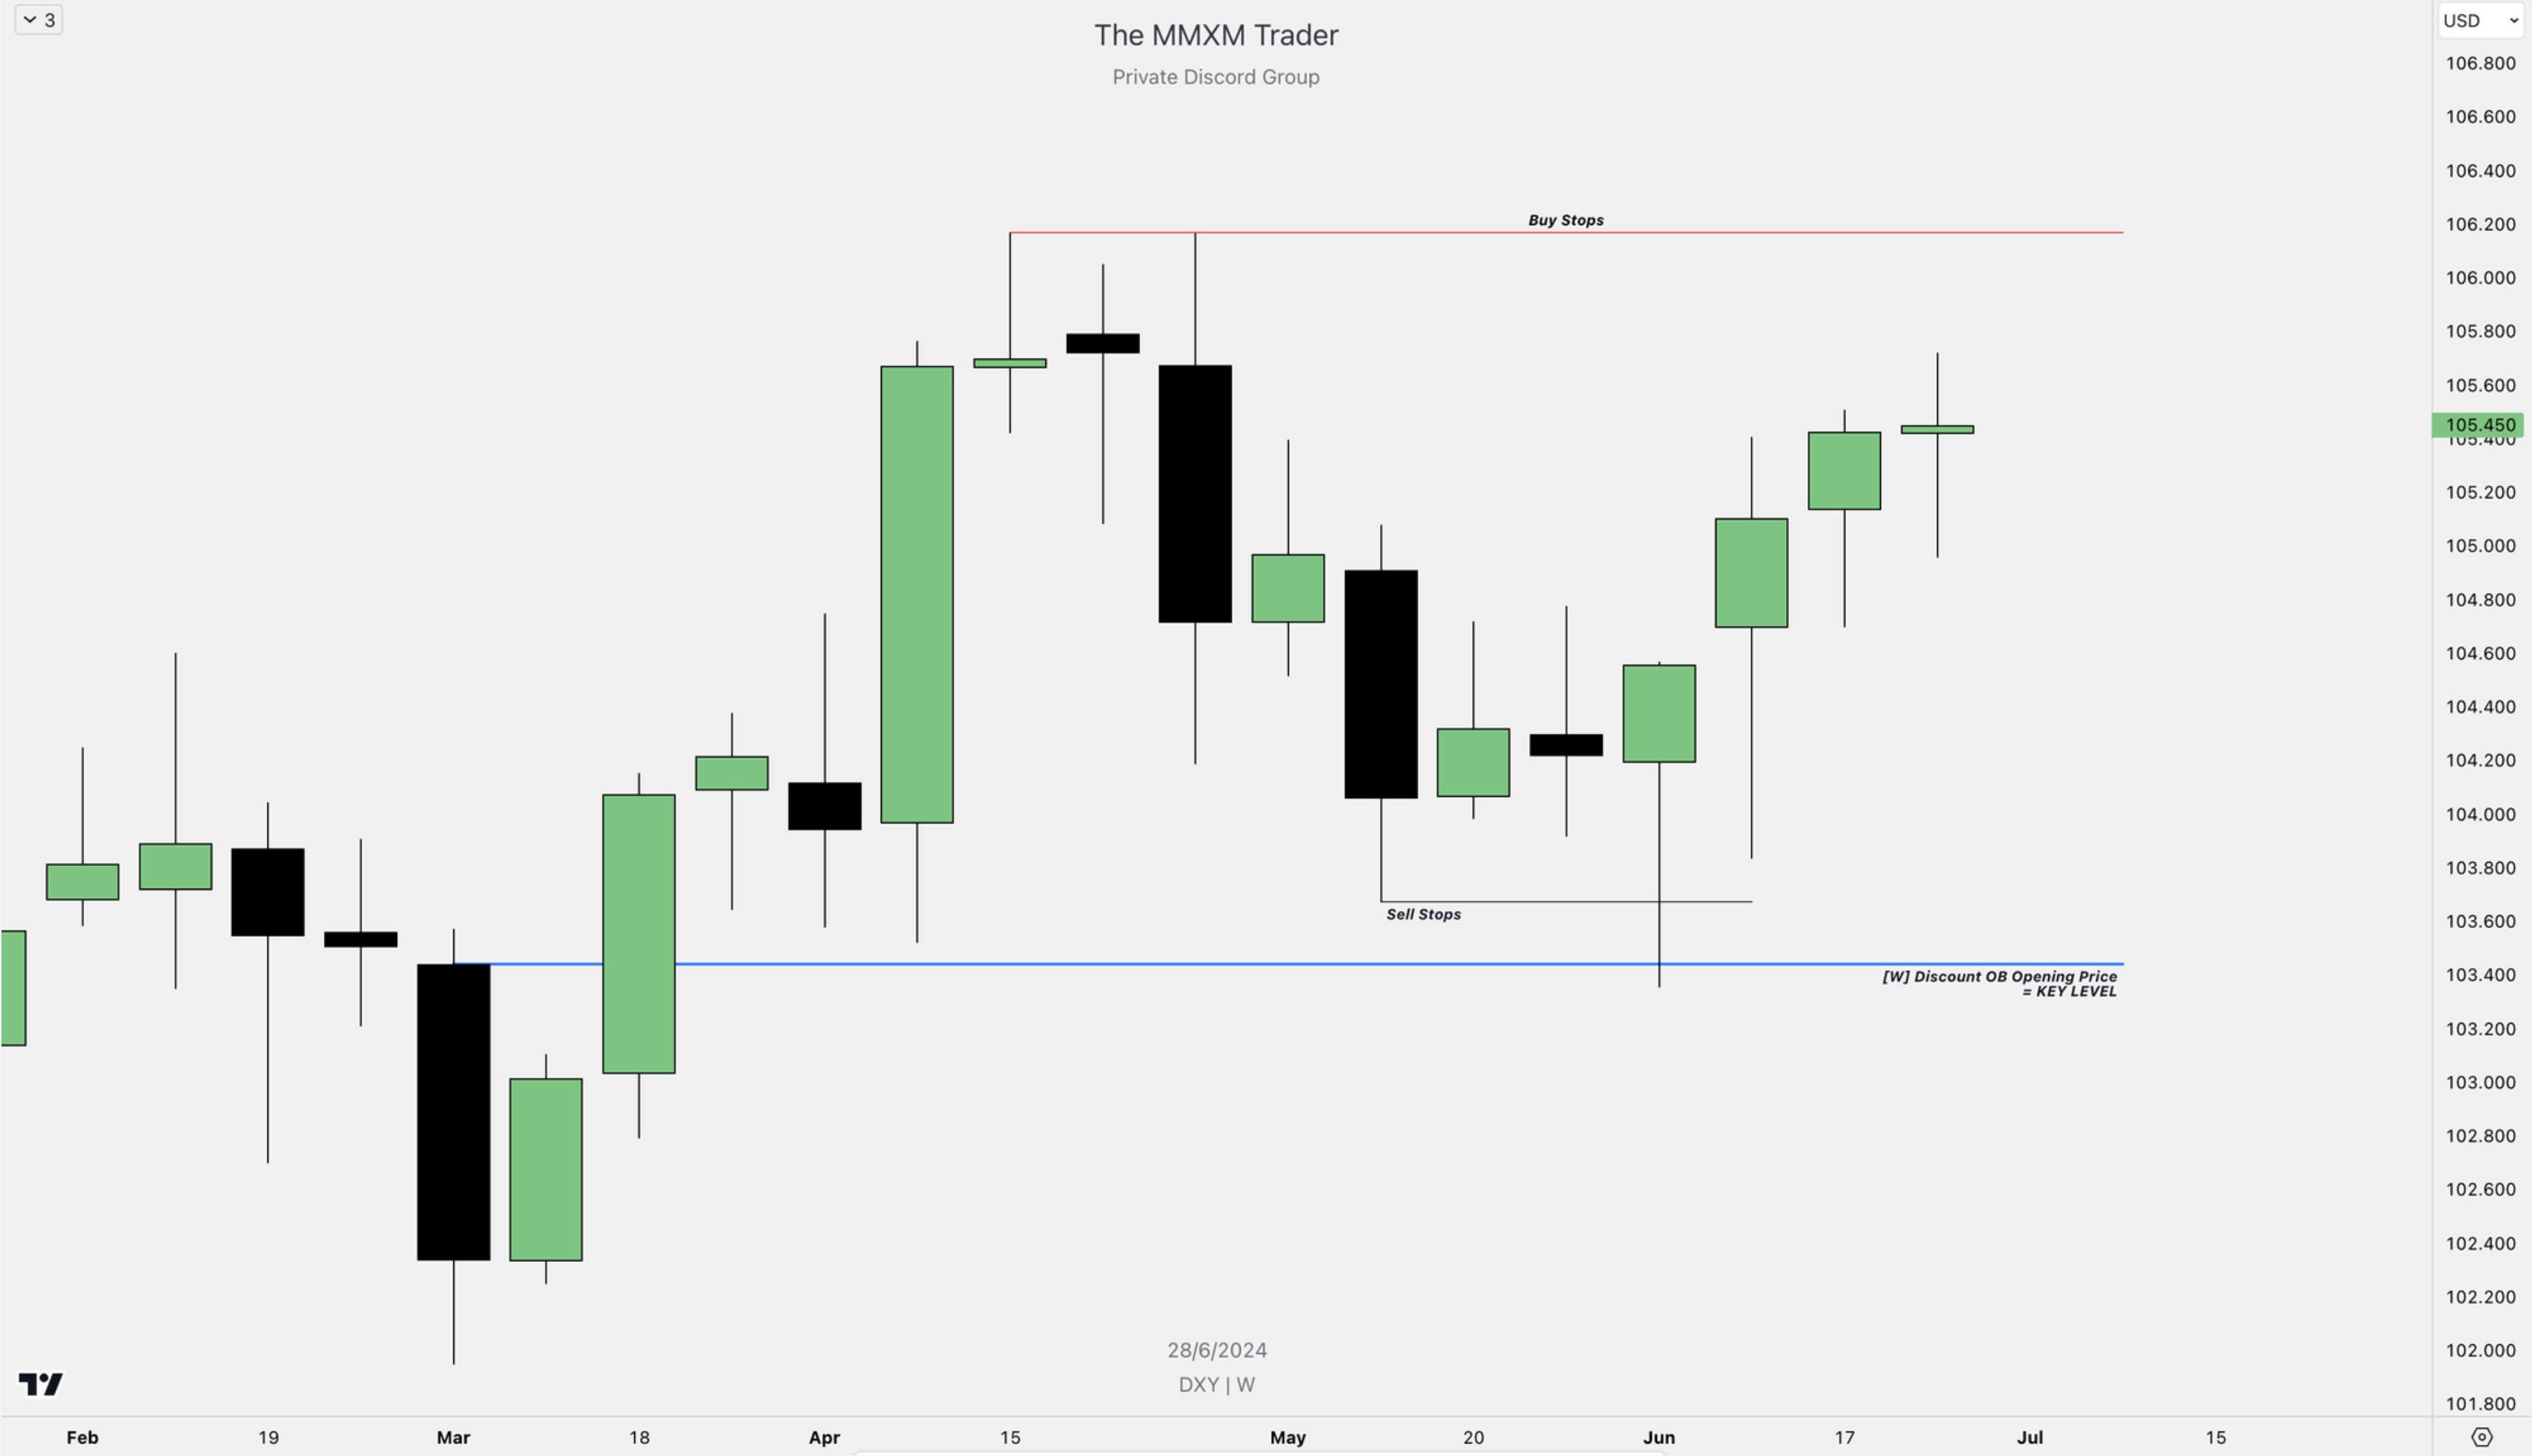

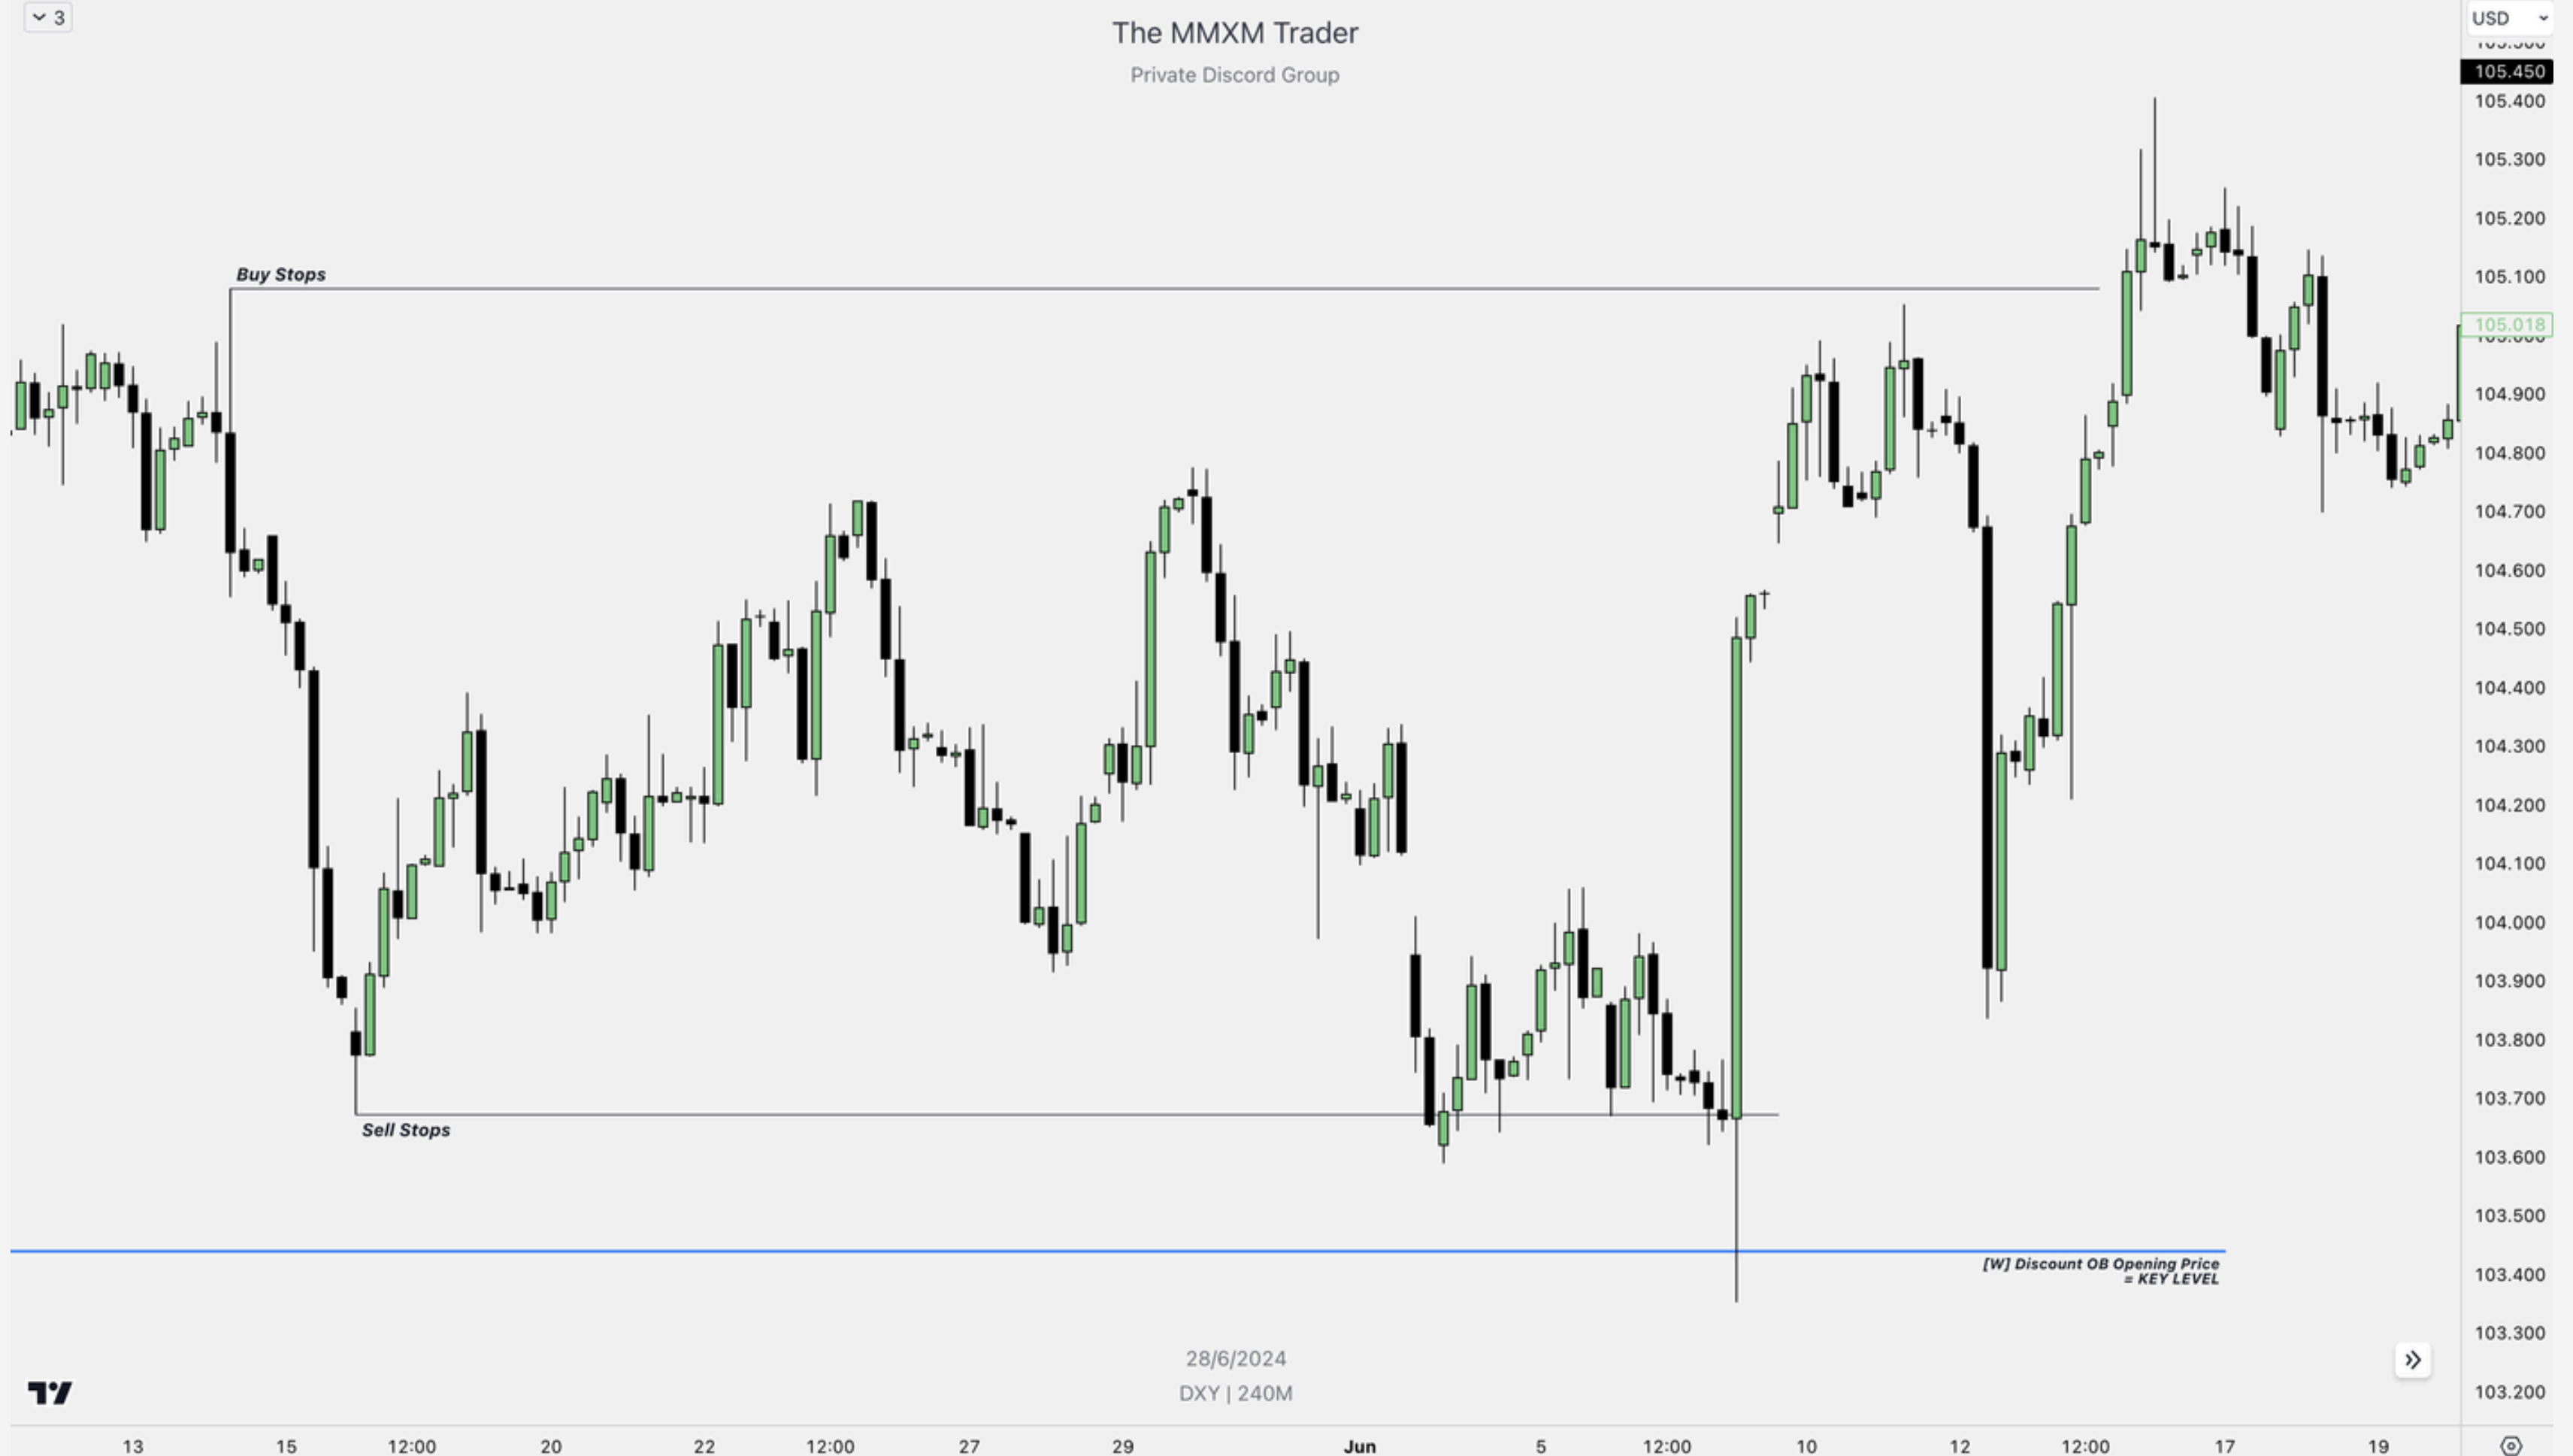

Understanding this is crucial because:

- It will help you determine the opportune moments to enter the market.
- It will guide you on when to stay out of the market.

The pivotal factor is **aligning yourself with the market's expansion phase.**

Your ability to trust that you are in an expansion phase relies on **understanding the previous phases** by knowing our position in the IPDA.

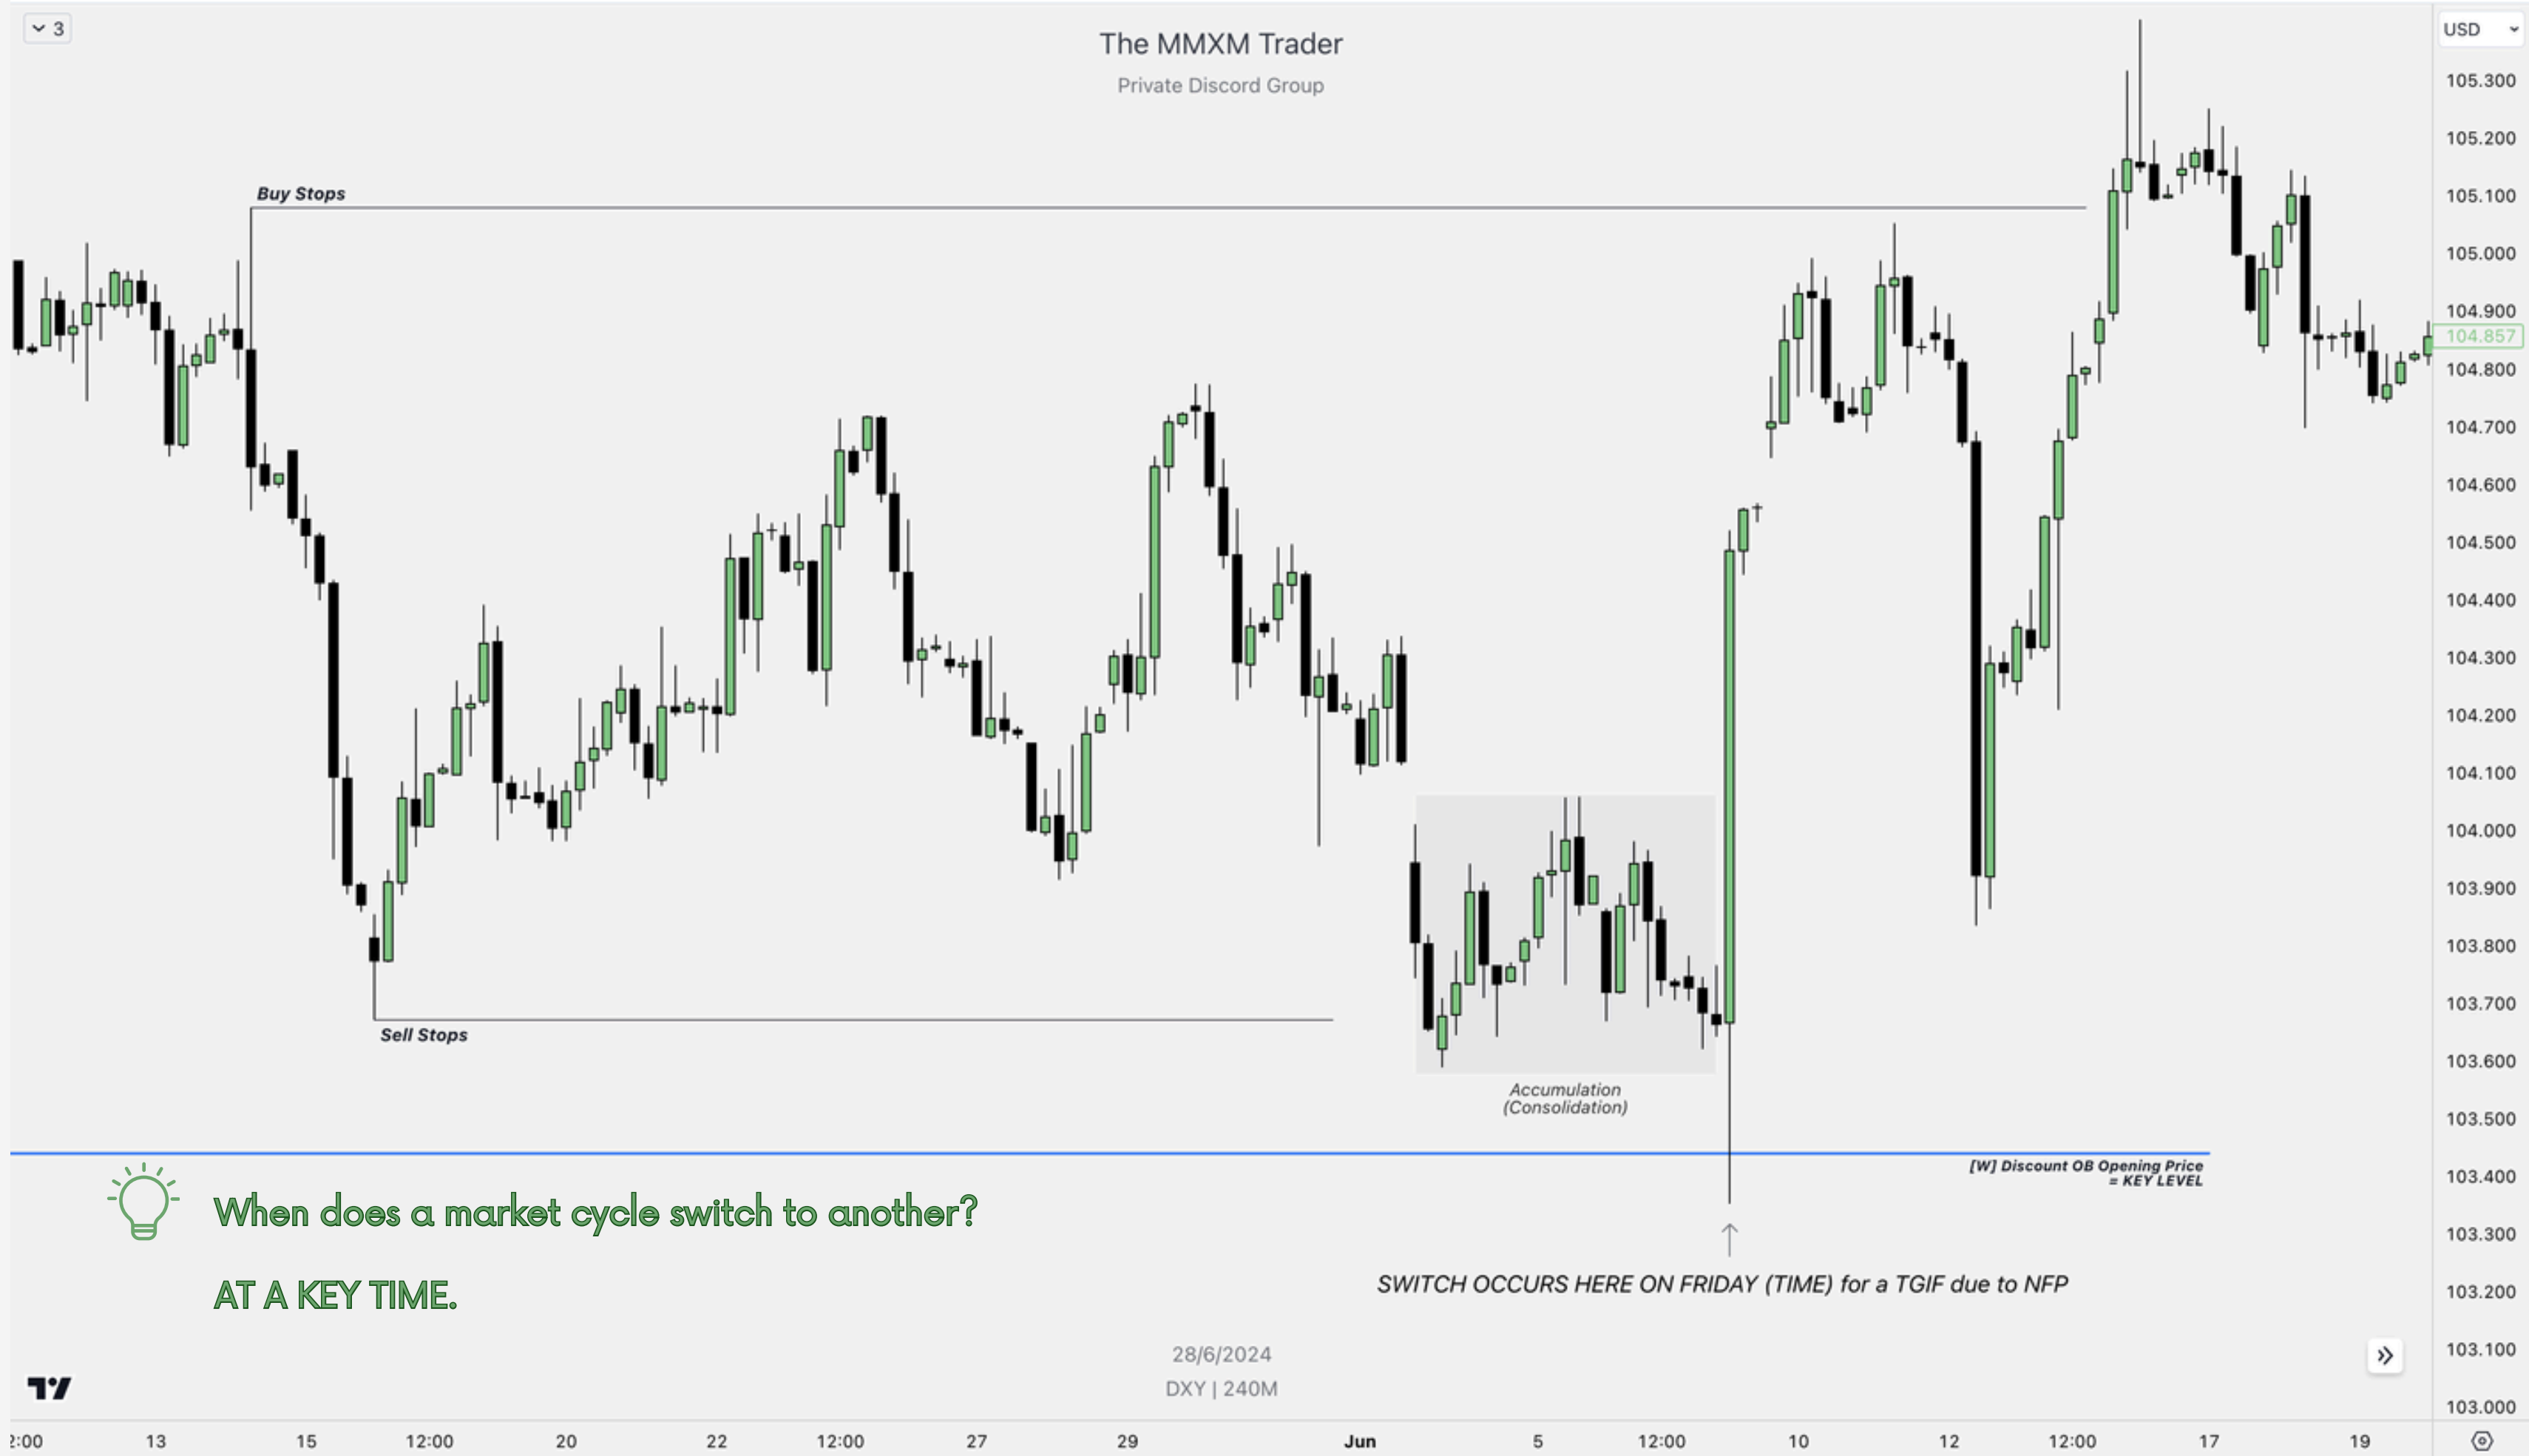

Living Off Charts (L.O.C) Trading Group

When does a market cycle switch to another?

AT A KEY TIME.

The MMXM Trader 06/27/2024 11:01 AM

What's up @everyone ... we killed it yesterday again on the DXY longs and our overall HTF DOL hasn't been reached yet so bias remains BULLISH.

DXY Key Level;
Daily Orderblock

We have USD news at 08:30AM & 10:00AM NY so this leaves me uninterested in London session, focus is only NY today.
Not pulling the trigger until the key level is hit and we get confirmation.

@The OTE Trader will be in the livestream for NY Session as well watching this.

The MMXM Trader 06/27/2024 8:37 PM

@everyone

Key level has been reached... i'm waiting for structure to confirm the idea for longs.
No structure = No trade.

We also have a news driver at 10:00AM.

@everyone

We will continue with this bias tomorrow depending on what Asia does... however going as planned.

The MMXM Trader

Structure forming after a sell-side run would be ideal.

The MMXM Trader

Yesterday at 10:23 AM

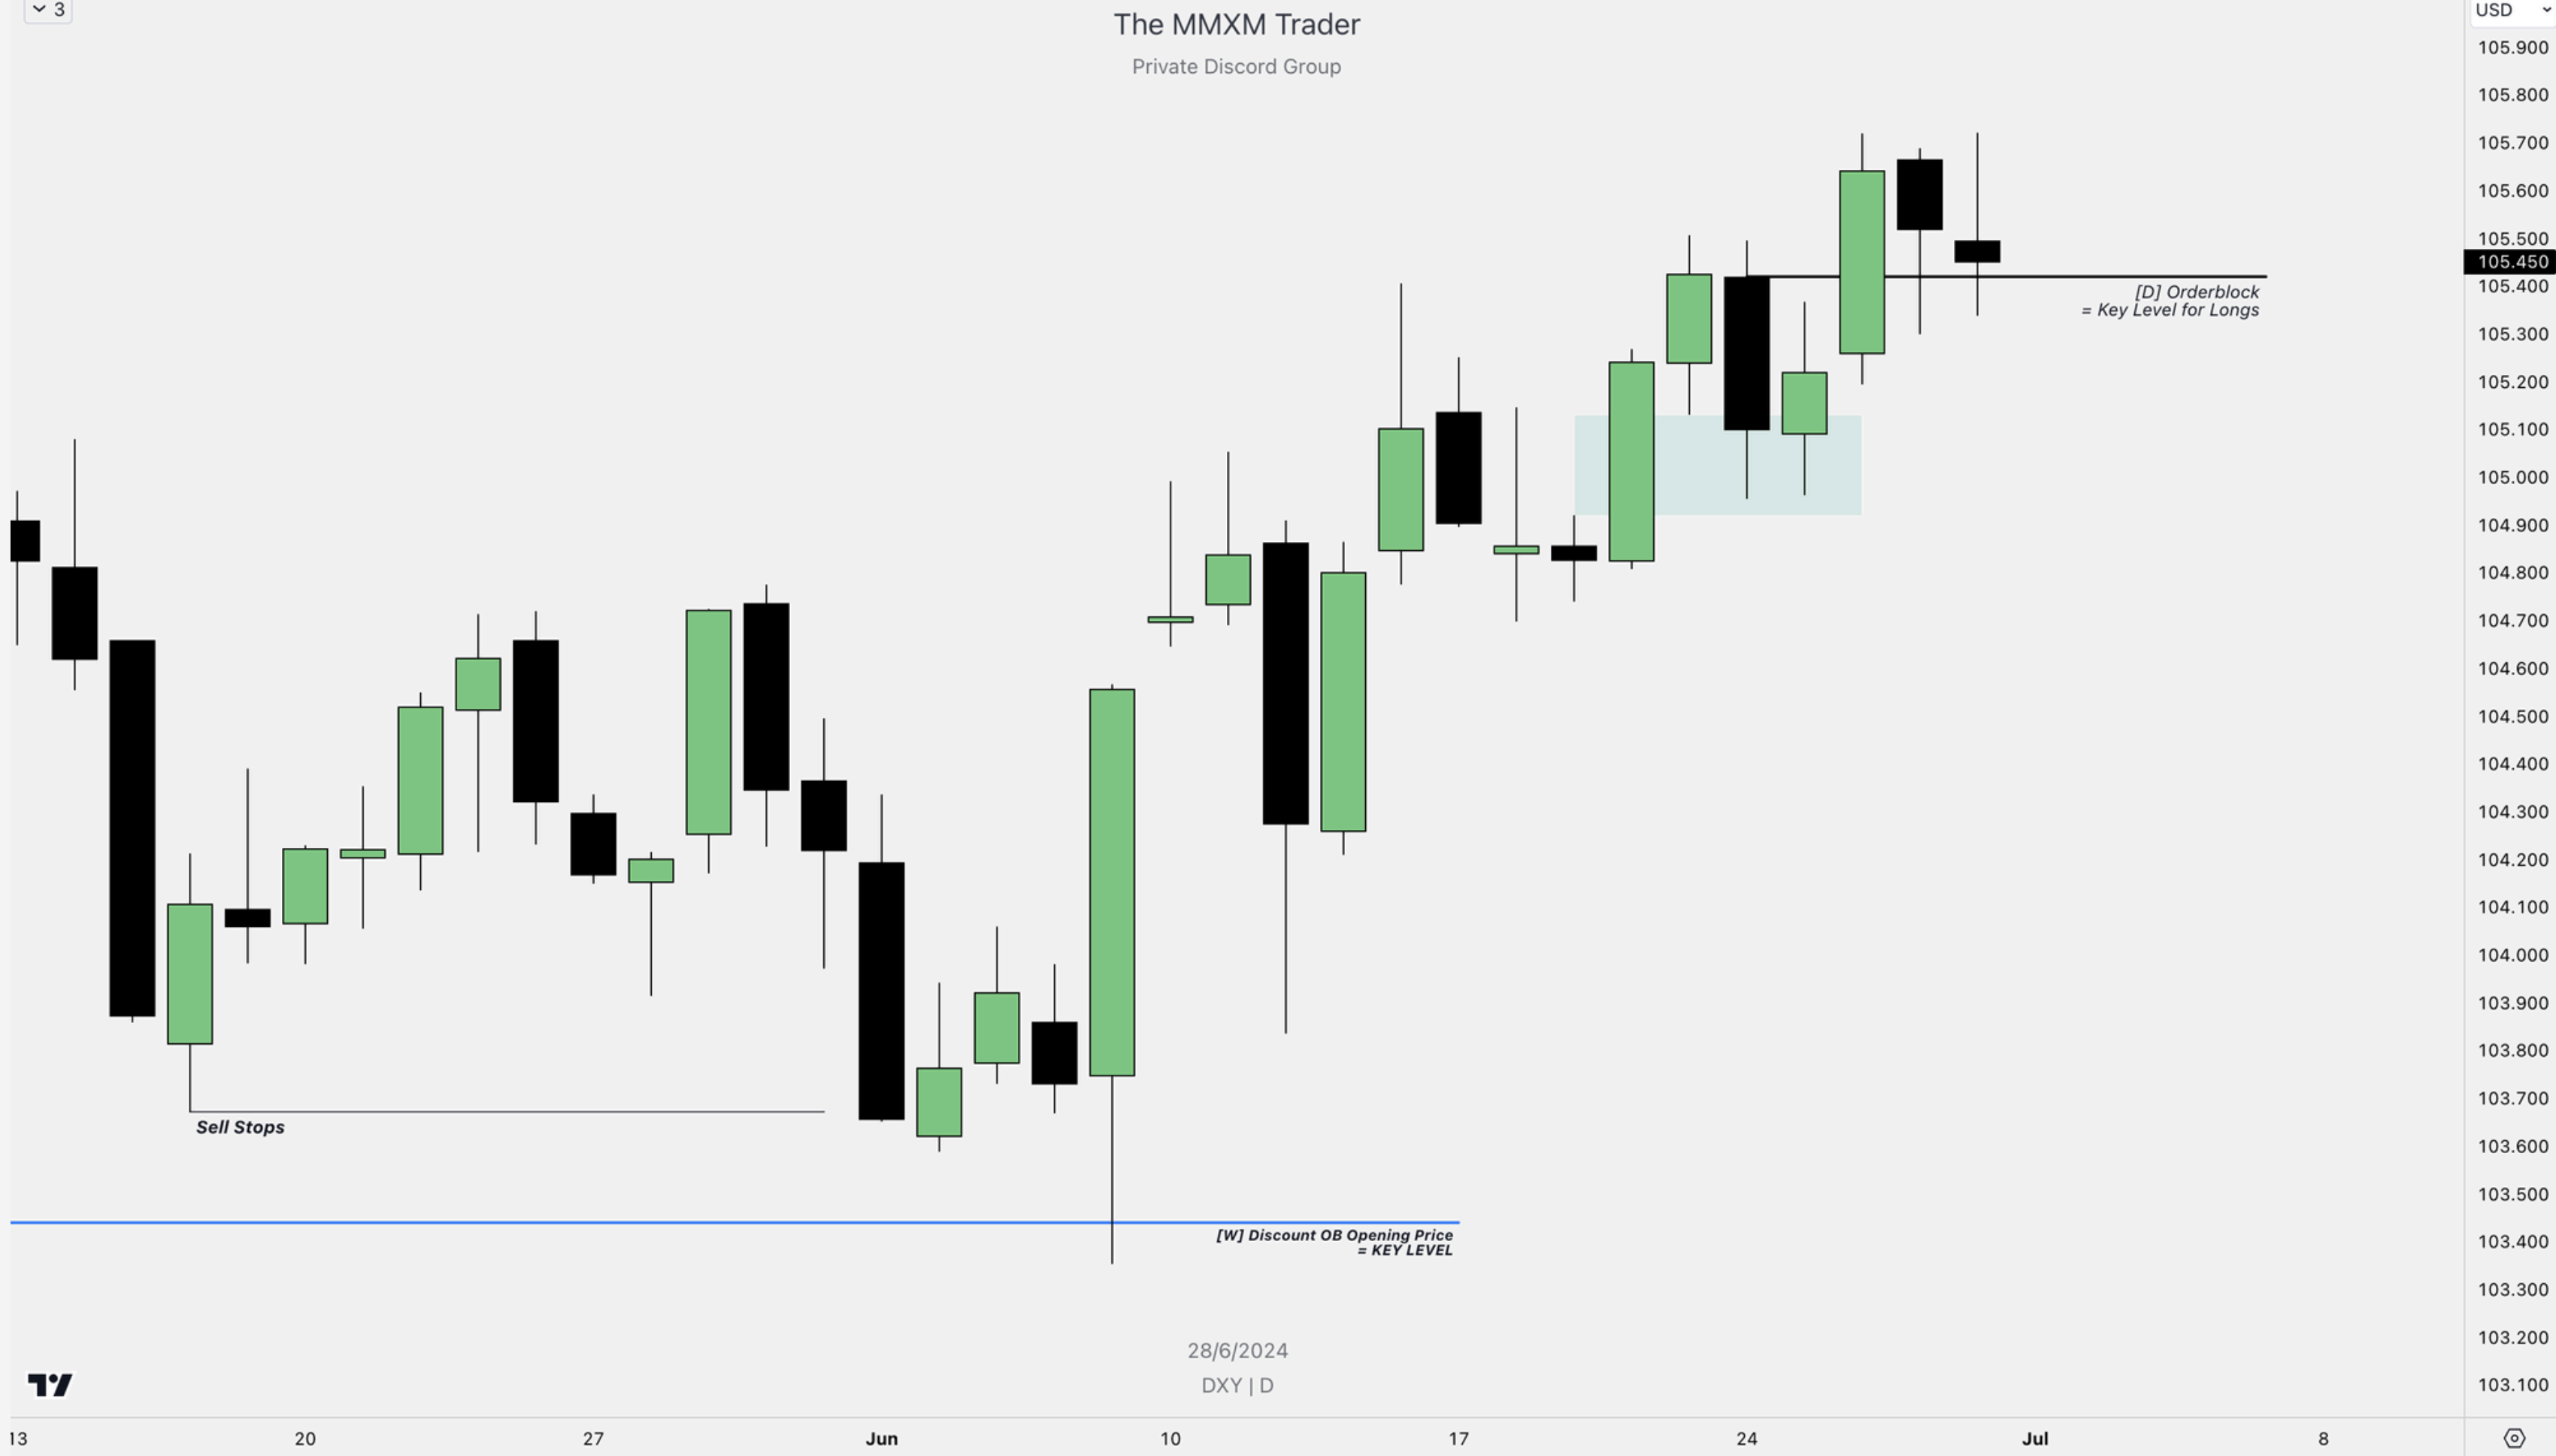

@everyone

There you go... draw on liquidity has been reached.
I guess i was lucky for the 3rd week in a row.

You should have all TP'd or Partialed your EU/GU trades by now.

Living Off Charts (L.O.C) Trading Group

Living Off Charts (L.O.C) Trading Group

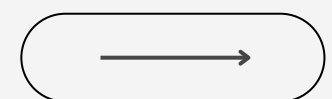

I anticipated that live before it happened;

Why can i read price like this?

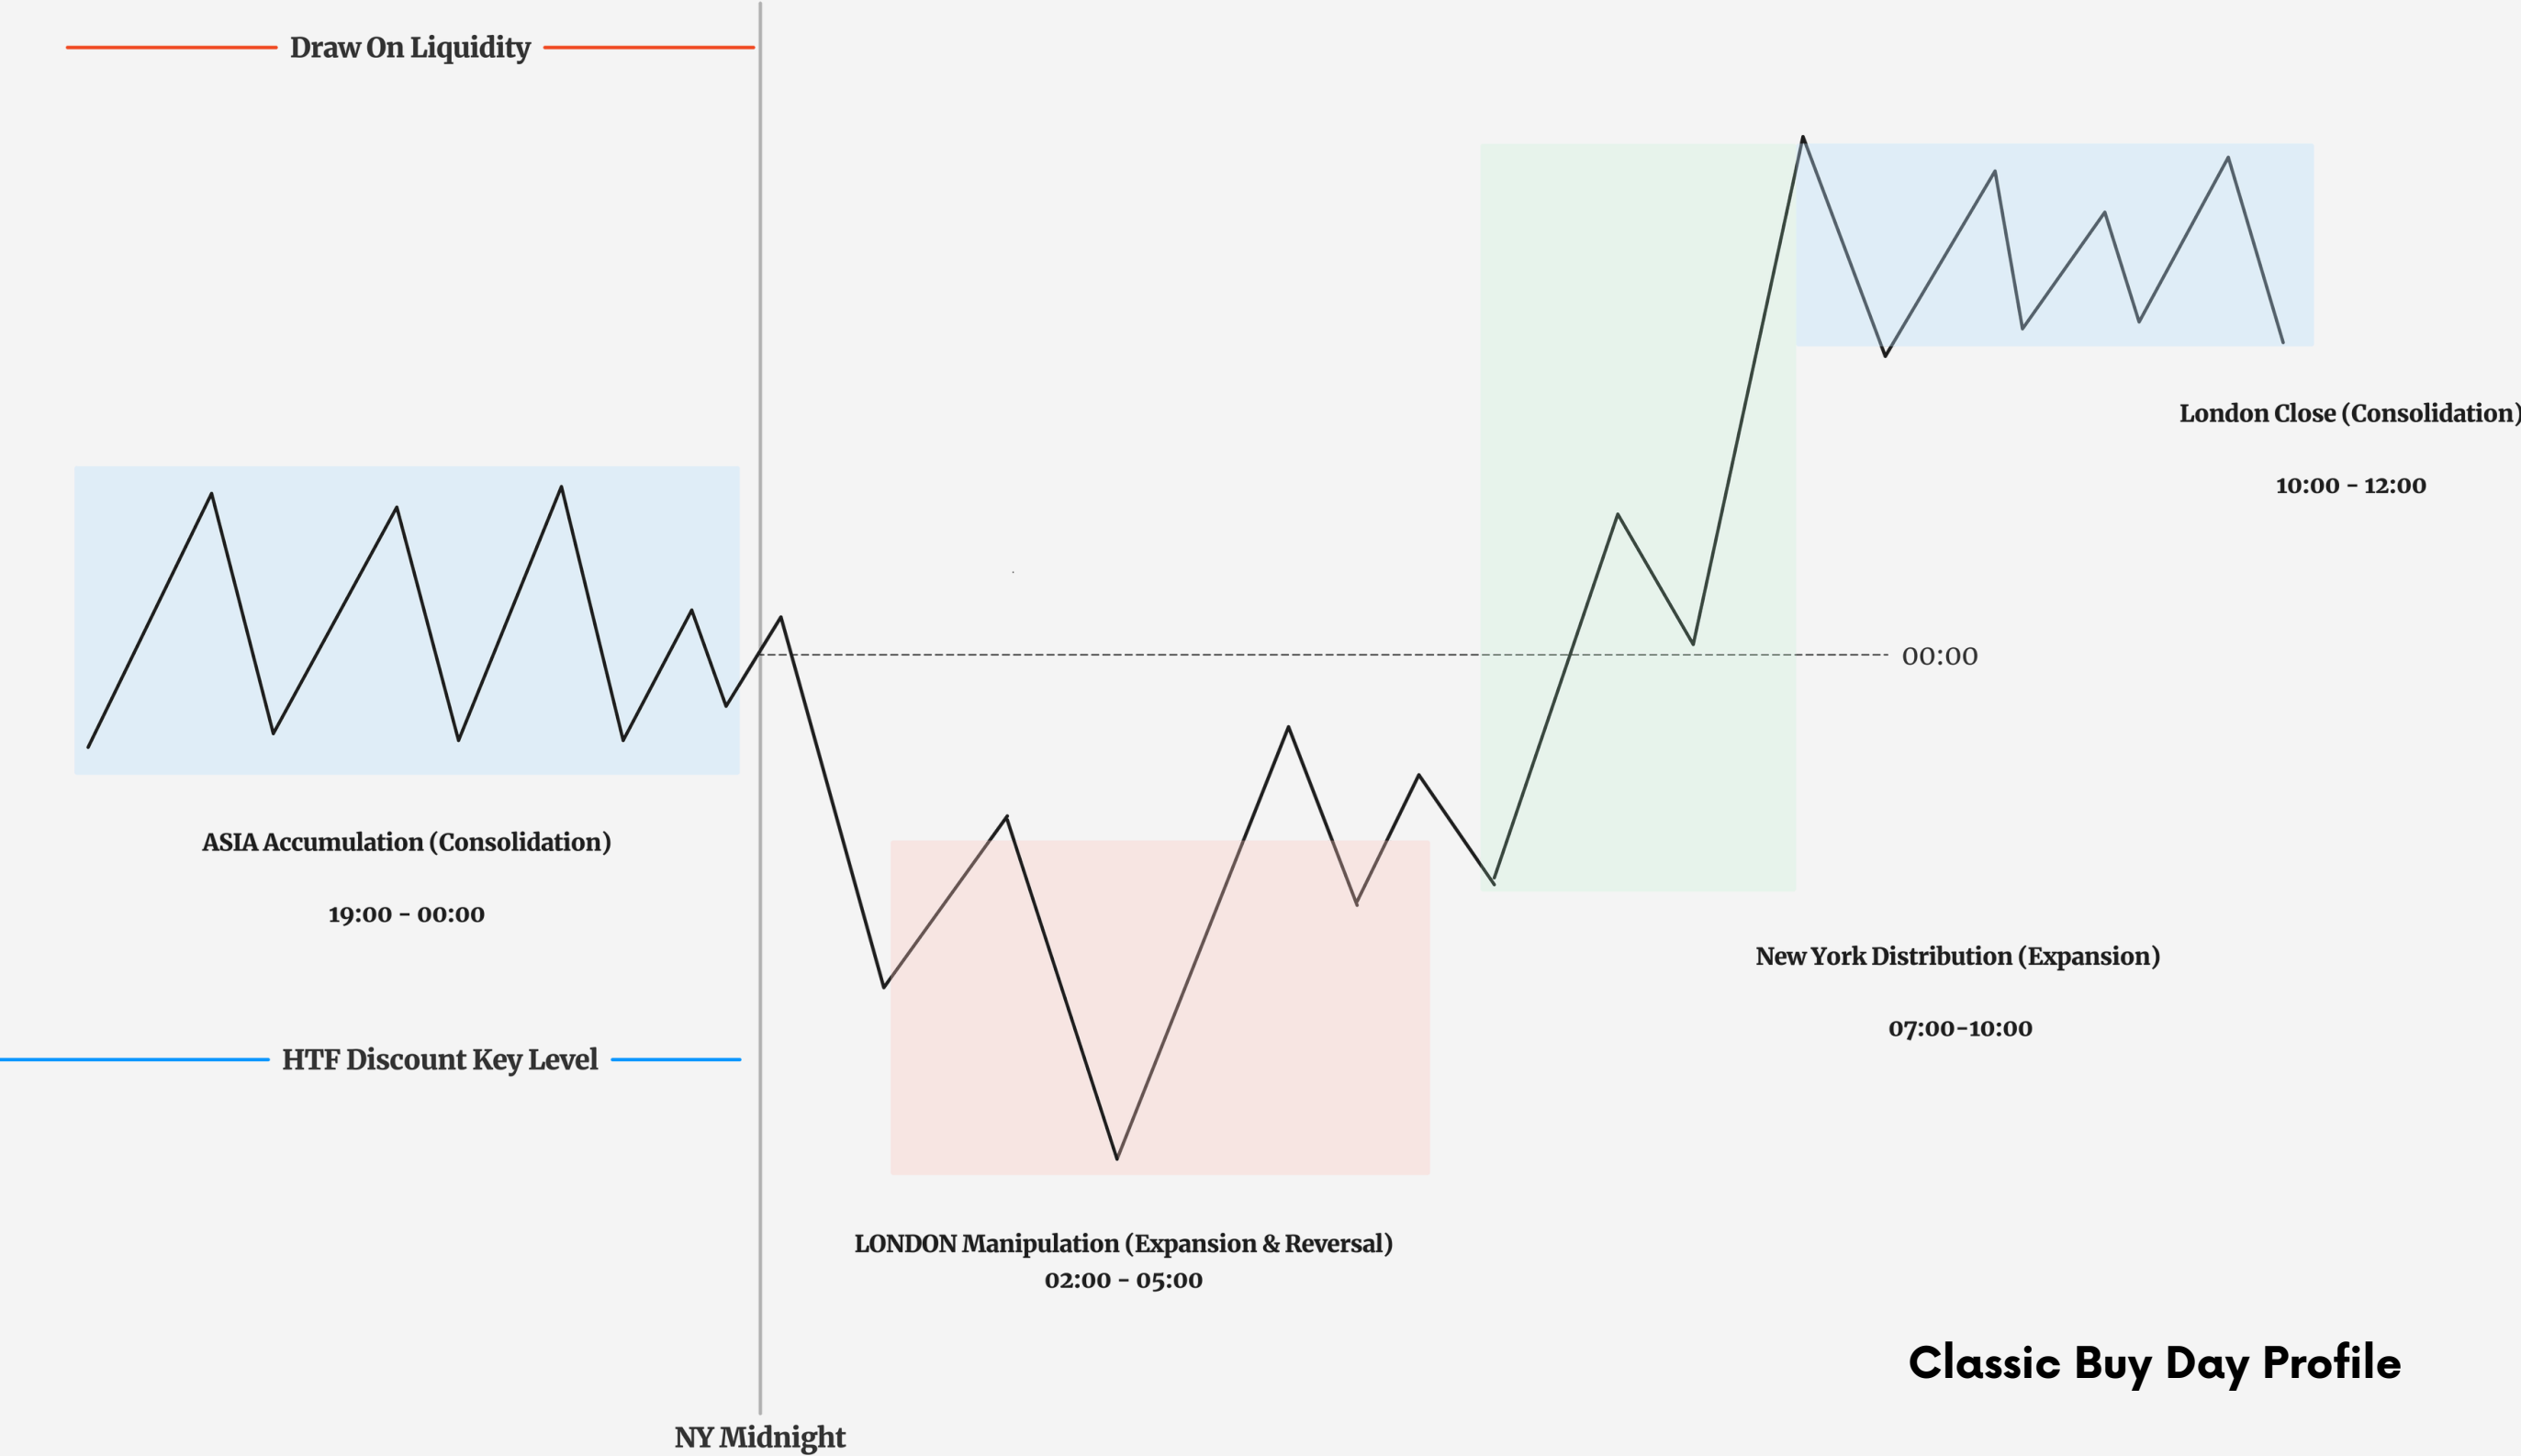

Because of my understanding of the IPDA.
