

OHLC/OLHC: The Anatomy Of A Candle

As short-term traders, our focus is on the Weekly & Daily Candle.

There are almost always 3 trade opportunities in one candle,

1. The Low Of A Candle
2. The High Of A Candle
3. The Expansion (Middle) Of A Candle

Your GOAL should be to first **MASTER ONE** of the above 3 opportunities.

Once you have mastered one of them,

you can look to master the next until you have mastered all 3 and mastered the entire formation of a Weekly and or Daily candle.

You cannot master 2 or 3 at one go, pick one and master it before the next.

- 3 trade opportunities within this candle**
- 1.The Low**
 - 2.In the expansion up**
 - 3.The High**

GBPCHF;
Looking for bullish structure on a LTF from the Daily FVG below us, i will update as we approach the FVG during the week.

July 8, 2024

@The MMXM Trader @everyone GBPCHF; Looking for bullish structure on a LTF from the Daily FVG below us, i will update as we approach the FVG during the week.

The OTE Trader 07/08/2024 4:02 PM

The OTE Trader vandaag om 09:50
Goodmorning everyone, GBPCHF and EURCHF looks to be the play early on this week. Draw should be higher as MMXM outlined in #exotics . SMT on the lows currently inside a key level (daily FVG)
Like to see closure above this 15min FVG and it should be golden to go into buy side of the curve. (bewerkt)

The OTE Trader Like to see closure above this 15min FVG and it should be golden to go into buy side of the curve. (bewerkt)

The OTE Trader vandaag om 10:35
If we close above this 15min downclosed, low of the day should be set.

HOMEWORK;

Use this teaching for DXY this past week (Week Of 8th July 2024) to see if you can find the same signatures in the Bearish Weekly Candles OHLC.

We will go deeper into this concept next video as its the foundation to the Weekly Profiles, OSOK & Day Trading.
