WHAT I LOOK FOR
WHEN I WAKE UP

WHEN NOT TO TRADE:
HIGH IMPACT NEWS CPI,
FOMC, FEDERAL INTEREST
RATES AND FOMC.

THE OTE Trader's Checklist

- DID WE HIT A HTF KEY LEVEL?
- DID WE GET 4H STRUCTURE TO WORK WITH?
- WAS THERE HTF SMT?

Once we hit a HTF key level, you want to see SMT and a MSS on the 4H to confirm that you are going into the other side of the curve.

- DID WE BUILD UP ENGINEERED LIQUIDITY AROUND EQUILIBRIUM?
- ARE THERE SHORTTERM HIGHS OR LOWS WE CAN USE?

If we're using a 4H dealing range, we want to see a 1H shortterm high or low formed around equilibrium of the 4H dealing range.

- IS THERE ANY KEY LEVEL BELOW OR ABOVE THOSE SHORTTERM HIGHS/LOWS?
- IS THERE A FVG, BREAKERBLOCK OR ORDERBLOCK PRESENT?
- DID WE HIT THIS KEY LEVEL? IF NOT, DON'T CHASE IT.

You want to be selling above an old high into a key level and vice versa for a buy setup. If price soups your high/low, but didn't go into the key level, you don't chase price. Sit on your hands.
