

Recent Monthly Recap

Looking at the recent trades we have taken where our model as occurred.

The basic premise to my model is that price is heading towards a Draw on liquidity, but before this it has a manipulation move in the opposing direction that stabs liquidity – a Judas move. Look at every example, price moves in the opposing direction then the correct.

“Identify this 9:30 manipulation, find the expansion’

*Unicorn
Model*

January 28th

Model Used: Unicorn Model

Trade Description: Price cleared engineered liquidity to the downside (opposite direction to our draw) at open price, before displacing towards our Buyside liquidity.

- Manipulation: Textbook example 9:30
- Draw on liquidity: Did not occur during the Asia range

Visual Recap:

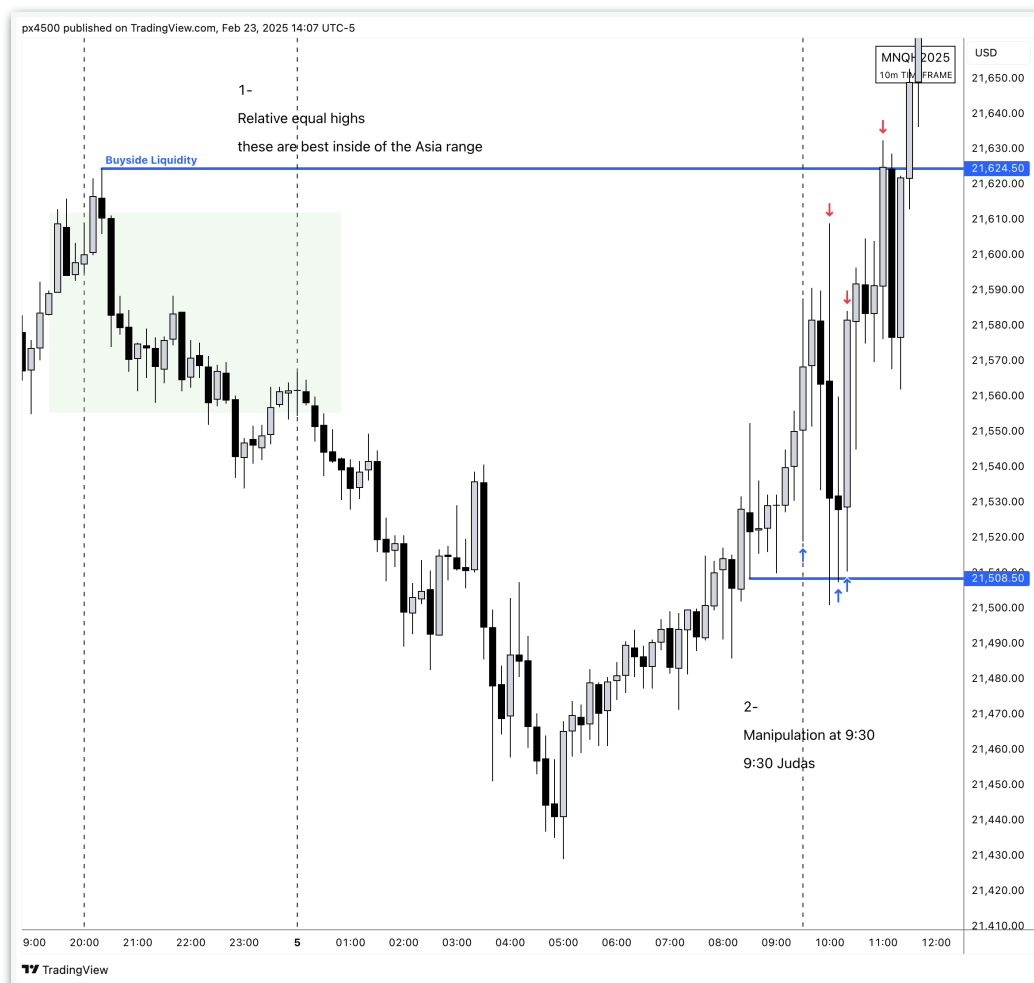

February 5th

Model Used: Unicorn Model

Trade Description: Price initially manipulated liquidity at 9:30, triggering a sharp reversal towards Buyside liquidity. Draw on liquidity had already occurred within the Asia range, providing confluence for the move.

- Manipulation: Textbook example 9:30
- Draw on liquidity: Did occur during the Asia range

Visual Recap:

February 6th

Model Used: Unicorn Model

Trade Description: Perfect smooth edges to the upside, although not inside the Asia range, we engineer liquidity to the downside, clear it at 9:30 then shift to the upside.

- Manipulation: textbook example 9:30
- Draw on liquidity: was not inside the Asia range

Visual Recap:

February 11th

Model Used: Unicorn Model

Trade Description: Draw on liquidity inside the Asia range, which is perfect as our first component. We then expect to see liquidity engineered to the downside (opposing direction to DOL) we clear this then shift towards draw.

- Manipulation: occurred before 9:30, this can happen at 8:30 instead
- Draw on liquidity: textbook Asia range

Visual Recap:

February 13th

Model Used: Unicorn Model

Trade Description: Draw on liquidity inside the Asia range, which is perfect as our first component. We then expect to see liquidity engineered to the downside (opposing direction to DOL) we can see manipulation clear these before displacing higher.

- Manipulation: occurred before 9:30, this can happen at 8:30 instead
- Draw on liquidity: textbook Asia range
